ACKNOWLEDGEMENTS

I am highly indebted to Prof. V.V. Modi for his invaluable guidance, constructive criticism and encouragement throughout the tenure of this investigation. My words fall short in expressing my gratitude to him.

I have benefited immensely from my association with Dr. H.S. Chhatpar and I am thankful to him.

I am grateful to Dr. M.R.S. Iyengar, Sr. Director, Antibiotics Division, Alembic Chemical Works, Baroda, for his interest in the subject and for providing the facilities for large scale fermentation experiments. Kind co-operation of Mr. M.S. Patel is sincerely acknowledged.

My heartfelt thanks to Miss Usha Verma and Miss Roshni Udwadia for their constant affectionate support throughout the course of this work by helping in one or the other way, without which the years of hard work would have seemed much longer. It is also nice to have a colleague like Miss Prema Reshamwala.

The award of Senior Research Fellowship by Department of Science and Technology (1979-1982) and by Department of Atomic Energy (since 1982), Government of India is thankfully acknowledged.

Thanks are due to Mr. Martin Chauhan for neat and excellent typing.

(Jaydev N. Dholakia)
