ACKNOWLEDGEMENT

“A dwarf sees farther than the giant when he has the giant’s shoulders to mount on.”

- Samuel Taylor Coleridge

1772 -1834
I am ever indebted to God Almighty for giving me this opportunity to study this topic of immense clinical importance.

At the onset, I express my heartfelt gratitude to my teacher and guide Dr. (Mrs.) T. B. Javdekar, Prof. & Head, Dept. of Microbiology, Medical College, Vadodara. I am extremely grateful to her for her prolonged interest, excellent guidance and constant inspiration. The success of this study would not have been possible without her uncompromising demand for quality. She made me realize that to hit bull’s eye, one must stay on the right track. Her vision helped me to see the obstacles, to overcome them, keeping my eyes off the prize. Hats off to her for not only setting my goal, but also making me understand the ways to reach it. She created confidence in me to clear the hurdles on the way. Her support and guidance can not be measured, only treasured.

I whole heartedly thank, Dr. (Prof.) S. C. Hotchandani, Dean, Medical Faculty and Professor & Head, Department of Pharmacology, for his cooperation and continuous guidance.

I feel obliged to my ex-guide, Dr. M. B. Shah, Prof. & Head, Dept. of Microbiology, S.B.K.S. Medical College, Piparia, Vaghodia, for suggesting the problem under the study, moral support, encouragement and critical comments during the initial part of the study.

I am extremely thankful to Dr. Mrs. Summaiya Mulla, Prof. & Head, Dept. of Microbiology, Govt. Medical College, Surat, for expert guidance and encouragement, fruitful discussions, and moral support even during her busy schedule throughout the preparation of my thesis work.
I wish to convey my thanks to Dean, SMIMER, Surat, and Medical Superintendent, Maskati Hospital, Surat, for granting me permission to carry out this work at these institutions. I am also thankful to **Dr. Vipul Srivastav**, Prof. & Head, Dept. of Medicine, SMIMER, Surat, for permitting me to study and include patients admitted in ICU and allowing me to interact with them. I am also thankful to **Dr. Mannu Jain**, Professor & Head, Microbiology, SMIMER, Surat, for granting me every facility to study patients and for carrying out all elaborate investigations in the department.

The preparation of work of this magnitude required commitment of many people. In such tremendous efforts, it is difficult to single out any individual because so many are involved. Yet, there are some who deserve special recognition. They are the medical officers and the nursing staff of the ICU, Maskati Hospital, Surat.

I thank all my **patients** without whose co-operation; this thesis would not have achieved this shape.

I feel indebted to **Dr. Rajubhai Baxi**, Prof of PSM, Medical College, Vadodara and **Shri Dilipbhai Shah**, retired Statistian, Dept. of P.S.M., Govt. Medical College, Surat, to statistically analyze the data in very simple and understandable manner.

Lastly, I thank my family who taught me to dream of not what life is but to dream of what life can be. During preparation of this manuscript, they provided me strength whenever my pen faltered. They boosted me to accept every challenge by conveying that never forget that only dead fish swims with the stream.

- **Shashwati P. Bhuva**
