I express my profound gratitude to my respected guide Dr. R. B. Subramanian, Reader, BRD School of Biosciences, S. P. University, Vidyanagar, first and foremost for accepting to guide me in my Ph.D studies. I am also indebted to him for his systematic and patient guidance and his dedication; for infusing confidence in me to move forward on a path strewn with hurdles. I am extremely fortunate to have him as my guide.

I am grateful to Dr. Datta Madamwar, former Head, and to Dr. K. S. Rao, Head, BRD School of Biosciences, for encouraging and facilitating my research work. Special thanks to Mr. Nitin Solanki and Dr. Lince George who went out of their way to help me so that my research work became easy at Vidyanagar. I am grateful to all the teaching and non-teaching staff of this department for providing a homely working environment.

I take this opportunity to express my gratitude to Dr. (Fr.) Vincent Braganza, Principal, and to Fr. Francis Parmar, former Principal, St. Xavier’s College, Ahmedabad who helped me a great deal. My heart felt appreciation to Dr. (Fr.) Vincent Braganza for allowing me to use the laboratory facilities at Xavier Research Foundation, and sharing the financial burden of the research work. I specially thank Dr. S. S. Shah, Head of Biochemistry Department and the other staff members of the department for their support, and for taking on my work load during my absence.

My heart goes out to thank Dr. Lancy D’Cruz who took me to the deepest jungles of the Shoolpaneshwar Sanctuary, exposed me to medicinal plants, saw the seeds of research, motivated and encouraged me by arranging plant materials in collaboration with the tribal medicinal men of the Dediapada forests. This work is made possible because of his unassuming, selfless help. I would also like to thank Mr. Ramsinh for procuring the samples from the forests.

I am also thankful to Dr. Lancy D’Cruz, Dr. Karuppudurai, Dr. Sigrid Liede, Dr. Mark Miller, Dr. Vindya Mohindra, and Dr. Almeida for sharing their knowledge of medicinal plants, taxonomy, and of various computer software. I would also like to
express my deep sense of gratitude to Fr. Raj, Dr. Clement, Ms. Gopi, and Ms. Gayatri for their critical comments, for sharing their technical knowledge and boosting my motivation.

I am very thankful to Dr. Lancy D'Cruz, Dr. (Fr.) Vincent Braganza, Fr. Vincent Saldanha, and Dr. Sudeshna for painstakingly proof-reading the thesis and rendering invaluable suggestions from the beginning to the final stage of my thesis.

Many thanks to Dipal, Pinakin, Jyaysi, Vishal, Pritesh, Rushi, Hardik, Anil, Justin, Edwin, and Prakashbhai for their enthusiasm to help, encouragement and for providing a very conducive environment and assistance throughout this period. A special thanks to my friend Hitesh for the technical help in the final stage of this thesis.

No words can describe the invaluable and constant challenge, support, love, comfort, motivation and the moral boost I got from my family: Joji, Anna, Andrew, and Alexi, my little Princess, for lighting up my face with a smile in the most difficult moments during this research career. My gratitude to my mother-in-law and other family members whose prayerful wishes were my source of strength all along.

Above all, my deepest gratitude to the Almighty, and to Mother Mary for giving me strength, direction and courage to complete this phase of my academic life.

Sebastian. V.A.
