ACKNOWLEDGEMENT

It is with profound pleasure that I take this opportunity to express my deep sense of gratitude to Professor U.V. Modi, for his invaluable guidance, encouragement, extensive help and constructive criticism. His quest for knowledge and striving for excellence will always remain a source of inspiration.

I am grateful to Professor K.K. Rao, Head, Department of Microbiology & Biotechnology Centre for providing the necessary facilities.

The constant encouragement, warm friendship and overwhelming help which I received from Dr. Anjana Desai has been an experience to be treasured.

It gives me pleasure to acknowledge Neera Tessler and Tribik Parekh for their help in the preparation of the thesis. Their constant support and enthusiasm was a great asset throughout the course of the work.

I also extend my thanks to all my colleagues, particularly Dr. Vaseem Palejwala, Dr. Smita Palejwala and Umesh Patel for their cooperation, willing help and pleasant company that made the work more enjoyable.

I wish to thank Narendra Vaghela, Reena Parikh and Lina Udhani for the help they have extended to me.

I am thankful to Dr. N.S. Subba Rao, Dr. C.S. Singh and Dr. V.D. Gaur of Indian Agricultural Research Institute, New Delhi and Dr. J. Thomas of Bhabha Atomic Research Centre, Bombay, for the help and advice that I received from them.

For the electron microscopic and photographic work, the assistance of Jayalaxmi Deshpande is thankfully acknowledged.

The Senior Research Fellowships which I received from Indian Council of Agricultural Research, New Delhi and Council of Scientific and Industrial Research, New Delhi, are gratefully acknowledged.

A word of thanks to Shireh Nagarthar for his neat and efficient typing.
