ACKNOWLEDGEMENT

The time has come to shed light on the path we (I and my thesis) took over the past four and a half years and to remember all the trials and triumphs that helped me metamorphose from a "caterpillar into a butterfly" in my field of research. It is time to reflect upon the experience and the fact of life that "Nothing worthwhile in life comes without STRUGGLE". This journey would not have come to such a beautiful turn without the help of some people who, in their own special ways, directed me to this destination.

I am indebted to my guide and supervisor, Dr. G Archana for her motivating suggestions; her constructive criticism, scientific advice, valuable guidance, encouragement, approachable nature, never ending patience and most importantly, the freedom and creativity she allowed me to have in carrying out my research work. I am very grateful to her for giving me this opportunity to learn, think and express my ideas. What made it all the more special for me and if I may say so for Dr. Archana as well, was the fact that I was her first doctoral student. It was a blessing to have you as my supervisor. Thankyou mam!!

I express my deep sense of gratitude to Prof. H. S. Chhatpar (former Head of the Department) and Prof. Anjana Desai (current Head of the Department) for providing me with an excellent library, internet and research facilities along with a competitive team-oriented environment.

I sincerely acknowledge Prof. Anjana Desai who was always there to protect, persuade and motivate us whenever we faced any difficulty in the research or in personal life. She was always there to with her loving, caring nature and stood like a mother whenever we needed her support and advice. Mam without your help and support this was not possible. I will always need your blessings!!

I wish to express my warm and sincere thanks to Prof. Volkmar Braun and Prof. Ranjan Chakroborty for providing me with strains and necessary chemicals, without which I could not have successfully finished my research work.

I am also thankful to Dr. Pranav Vyas for his positive suggestions during the course of my work. My heartfelt thanks Dr. S. Ingle, Dr. A. Nerurkar and Dr. M. Nair for readily extending help whenever required.
I sincerely acknowledge the DBT-CSIR, India for JRF fellowship.

Having Arif Khan as a coworker made me experience every possible moments that two subordinates might share when they work together. Working with him made me learn the dos and don'ts that one should follow if two people were to eat the same piece of cake but from different edges. It was a nice experience working with you Khan. Thanks!!!

It was always nice to have friends and labmates like the RLII members: Falguni, Ruchi, Murli and Aparna Mam, they always helped me in whatever way it was possible. I specially thank Falguni Joshi, I could not have asked for a better person to share this long journey of my research with. We received all bundle of failures, as well as success parallelsly. Our share of failures and triumphs made it all worthwhile and taught me a valuable lesson for life “failures are keys to success in life, let alone research”. Ruchi and Murli it would have been difficult to complete this journey joyously without your company and the prayers of Aparna mam. Thanks!!

I would like to applaud my dissertation students Aparna, Parchita, Shreni and Falguni Singh for providing a fun work environment and for instilling patience in me. Shreni and Aparna, you guys have done a great job all along. Aparna, thank you for being wonderful and supportive in all our interactions that began when you came in as my dissertation student and continued nicely when we became colleagues. Thanks yar!!

Research work is full of new ideas and sudden planning’s, these are the times when you feel shortage of requirements. I would like to especially thank Praveen bhai and Mandvekar bhai who always there to lend a helping hand. A special thanks to Thomas Mam, who many times went out of the way and helped whenever needed urgently. Thanks mam!

I sincerely acknowledge the help lended by Model Farm and GAU Anand in providing plants and soil whenever required.

I am grateful to all colleagues and my juniors: Avishek, Vipul, Harish, Sapna, Ketan, Sumant, Darshan and Radhika for their help, company, encouragement, competition and for their moral support. A special thanks to Mr. Manish Shukla to give an opportunity to experience tough time that colleague with different opinion might have at research. By dealing with him I learned to deal with such situations. He made me aware of the TA post available when I was in great need, I can never forget his sincere help at that point of time. Thanks!
Life would be a drag if it were not for Anil, Subbu, Murli, Nandan, Priya and Kuldeep, who were fun to be with. Thank you to Geoby, Mahima and Soshina for our informal chats and to Marpay for brightening my day with funny jokes. The time I spent singing with Sandeep and other MSc students lightened my heart. Without all of them it would have been difficult to deal with tensions of life. Thanks yaar!!!

It is difficult to overstate my gratitude to Mr. H. S. Khatri, Mr. M. Chuahan, Mr. J. K. Nair, Mr. Varghese, Mr. B. Talati and Mr. S. Panchal for their help and support. A special thanks to Mr. Shirish Nagarkar for the printouts and other relevant help whenever required.

Dhanyawad, Babubhai, for providing refreshing tea.

I thank Mr. Bragdish Iyer for being a wonderful fellow lecturer during my teaching assistantship. I sincerely acknowledge the help and valuable ideas shared by Ms. Tulika Munshi, Mrs. Archana Rajesh and all the GRC students. I specially thank Ms. Aditi, Mr. Gopit and Mr. Vikas of Dept. of Biochemistry for all their help. Thanks guys!!

I sincerely thank Prof. P. M. Mehta, Director ARIBAS and all my colleagues at for being cooperative, and sharing a nice fun tea time which lightened up my mood and I could easily finish my thesis writing.

I would like to acknowledge Prof. Datta Madamwar former Head of Department of Bioscience, Sardar Patel University, for allowing me to use their departmental facilities whenever needed. A special thanks to Prof. K.C. Patel and Dr. Ujaval Trivedi for permitting me to utilize their lab facility to carry out the GC studies. I would like to express my gratitude towards Mr. Kishor Chauhan, Ms Hema, Ms Rachna and Baby (Ms Kavita Sharma) for their kind help in carrying out work at their lab.

I take this opportunity to thank Dr. Haresh Kelaria, his wife Uma and daughter Ummati for being there like a family and helping me and Sanket whenever needed in whatever possible way. We love you sir, thanks!!

Umashankar, joined with me in the same project as a colleague. His presence made it easy for me to get adjusted to a new place, new environment and new people around. I acknowledge, all the time we spent together and the nice talks we had at tea time. You made my life easy, Thanks Uma! I extend my sincerely gratitude to Rasesh Parikh for sharing a short and sweet time together.
People say not to get married while doing your PhD, but if the extended parents are like my Mummy and Papa, then it’s not so. I apologize to them for all the discomforts that they had to bare during my research work and thank them for all the advices and adjustments they did to make our work easy and fast. I love you!

I would like to express my sincerest thanks to my brother Kittu for encouraging me to embark upon this journey. He is the sole reason why I attended the interview for this project and the rest as they say is history. Numerous scintillating conversations with Vidhya (my sister) and Prashant (jiju) made my work easy at the department. They were always there to help in whatever way possible. Without their love and moral support this journey would have been arduous. Love you Kittu, Vidhya and PjT!

I owe my research work to my loving life partner and my dearest companion Sanket. His presence in my life from the past ten years made my life beautiful including research. Without his understanding, encouragement, endless patience, emotional support and sacrifice it would have been impossible for me to finish this work. His love and support was my strength in every moment of STRUGGLE. I wish that everyone is blessed with such a companion.

There are two people without whose blessing, prayer and support nothing could have moved in the right direction. Their unconditional love, constant encouragement, sacrifice and the effort made by them to inculcate in me, the moral values, ethics, faith and strong principles towards life, which instilled in me fortitude to face any ups and downs in life with ease as well as research, is beyond thanks. I dedicate my thesis to my Amma and Appa as a gesture of love and respect.

I am forever grateful to all the teachers who have taught me and to mercy of the Almighty.
