ACKNOWLEDGEMENT

I take this opportunity to express my sincere and profound gratitude and appreciation to my research guide Prof. Dr. Nitin J. Vyas (Head of Philosophy Department, M.S. University, Baroda) for his able guidance, keen interest and valuable counsel at all times during the course of the preparation of this thesis.

It would have been never possible to reach this culmination without the silent blessings, sustained inspiration and patronage of my beloved father who helped me a lot and persuaded me to accomplish this work.

It would be unworthy of me if I do not express my reverential thanks to our Trust Secretary Shri Jitendrabhai C. Patel of Shree C.A. Patel Learning Institute, Mota Fofalia, Tal; Sinor (where I served as an educator out of my dedication for few years from now) and all my colleagues in general, and Shri Pratikbhai Patel, and Shri Janakbhai Patel our earstwhile co-workers and comrades, in particular, and also Miss Seema Boni (Computer co-ordinator) of the Learning Institute for their readily available cooperation and help rendered in the computer work from time to time for making my project a success.

The present Thesis is the first flowering of my endeavour which may still need a long time for its fruition!
