ACKNOWLEDGEMENTS

Any piece of work especially research is difficult to accomplish without the support, cooperation and contributions of a number of significant individuals. Firstly, I thank God for making this possible and for giving me the patience and strength to endure whatever challenges came in my path.

I wish to acknowledge the efforts of my guide, Dr Padmini Ghugre, Associate Professor, Department of Food Science and Nutrition, S.N.D.T. Women’s University. Her focus and vision have played a major role in shaping up this research work. I have had the opportunity to learn some fine nuances of writing from her. She has been a great support especially when I found myself at various crossroads.

Dr S.A. Udipi, Professor and Head, Department of Food Science and Nutrition, S.N.D.T. Women’s University was one of the individuals who suggested and encouraged me to study cognition as a part of my research. I am thankful to her for helping me balance my research work and teaching assignments so that I could pursue both with equal zeal.

My co-guide, Dr Mrinalini Purandare, Associate Professor, Department of Psychology, S.N.D.T. Women’s University has truly been a savior and anchor to the entire cognitive part of this study by providing a much needed clear direction and focus to it.

There were many other individuals who contributed to shape up the cognitive part in their own way. This includes – Dr Ravikala Kamat, Former Head, Department of Human Development, Mr Chandrashekhar Gawali, Assistant Professor, Department of Human Development, Dr K. Srinivasan, Head, Dept of Psychiatry, St John’s Hospital and Dr Susan Thomas, Cognitive Psychologist, St John’s Research Institute, Bangalore.

I appreciate the efforts of Ms Ruchi Charekar, Nutrition Mission, Govt. of Maharashtra who got me in touch with Mr Bharat Pokharkar, Deputy Commissioner, ICDS, Konkan region. Mr Pokharkar was kind and generous to not only allow me to collect data from anganwadis but also, introduce me to a number of CDPOs of Mumbai city. I thank Mrs Ghatge, Mrs Shinde and Mr Maske for readily participating in this study and
extending their wholehearted support and co-operation during the process of data collection. Special thanks to Mrs Rajni Ghadge, Mrs Shubhangi Rane and all the area supervisors, *anganwadi* workers and helpers for their unconditional support and co-operation. I am grateful to Ms Rupali Dixit and Ms Poonam Pashte, psychologists, for patiently administering the cognitive tests to all the children and for readily working in difficult conditions.

I am thankful to Mr J.C. Sharma and Mr Sanjay Ghadvi for their inputs during the statistical analysis.

A number of my dear friends have played a key role by their periodic pep talks and creative inputs. I thank Ms Bijal Lalan for the constant moral and technical support. I also wish to acknowledge my friends and colleagues - Mrs Sheetal Bhat, Ashwini Salvi, Aparna Thorat, Monica Ghangrekar, Sharvari Malshe, Apurva Agashe, Dr Angeline Jeyakumar, Dr Rita Patil, Dr Neha Paharia Agrawal and Dr Neha Lohia for their constant support and encouragement.

I appreciate my close friends, Padmini Singh, Shashank Gupta and Kapil Bhatia for their moral support. My dear friends, Harini Nandhakumar, Bhrijmeet Sethi and Uma Shet were my periodic stress busters; thanks to all our light-hearted and some thought-provoking discussions. I truly missed their presence.

I consider myself fortunate to have an extremely patient and understanding family. I thank Amma, Appa, Ayi, Chitra and Amit for putting up with me during the last couple of years. I also thank Hariniakka for sharing her experience and providing valuable suggestions and advice.

To the end, I wish to express my heartfelt gratitude to all the children and their parents who willingly participated in this study. Finally, my heartfelt appreciation to Mr Robin Sharma whose writings have constantly motivated and inspired to make small daily improvements in work and be more happy and a kind person.

Thank you all for your love, support and wisdom.
