ACKNOWLEDGEMENTS

The author would like to express his humble gratitude to the Almighty, the most gracious, the most merciful for providing him with the strength and will to undertake this task.

The author would like to express his deep sense of indebtedness and gratitude to his guide Dr. P.S. Nagaraja, Associate Professor, Faculty of Engineering-Civil, UVCE for his active encouragement, indulgence, academic and emotional support for completion of research work.

He is also thankful to Prof. B. Santhaveerana goud, Chairman, Faculty of Engineering-Civil for his timely help and encouragement during the research work. He would like to express his high sense of gratitude to Prof. N. Munirudrappa and Prof. H.N. Ramesh profusely for their valuable advice and support throughout the course of his research work.

It is a pleasure to recall the names of his friends Dr. A.V. Sriram and Dr. H.B. Nagaraj with whom he had constructive discussions and pleasant moments. He would also like to express his thanks to Dr. G.R. Dodagoudar, Department of Civil Engineering, Indian Institute of Technology, Madras for the valuable advice he received while carrying out fuzzy based reliability analysis.

The author takes this opportunity to express his gratitude to the Management, Principal, and Head, Department of Civil Engineering, Bangalore Institute of Technology, Bangalore for their help and support extended to him during the course of his research work. He also thanks D. Shivaprasad, Prof. M.U. Aswath, Vathsala and all other colleagues for their cooperation. The author would like to place on record his special thanks to K.V. Vijayendra, who was a constant source of inspiration and moral support.

Last, but not least, the author thanks his family members for their encouragement, patience, and support throughout his research work.
