In the Name of Allah the Most Beneficent and Merciful. He is the one, who controls every activity of this Universe and sustains every living being.

This research study was carried out in post trauma situation after the tragic accidental death of my father in the first year of this research study. It is almighty Allah who gave me courage and withstood me from that condition, and there has been some great efforts of some great persons whom, I would like to acknowledge for their help during this study.

It is a matter of Satisfaction and joy to acknowledge and express my deep respect, affection and honour to my esteemed teacher and supervisor Prof. A. R. Khan, Ex. Head P. G. Deptt. of Zoology, ex-Dean College Development Council, The University of Kashmir who boosted me with confidence and courage during this tough study.

I pay my blissful thanks to my revered co-supervisor, Dr Showkat Ali Zargar, Prof. and Head Deptt. of Gastroenterology, Sheri-e-Kashmir Institute of Medical Sciences, Soura, Kashmir for his kind support without which it would have been impossible to complete this medically oriented study. Besides being the busiest gastroenterologist of the state, gave me his precious timings in the teaching of research tactics. His sympathetic, inquisitive and sober approach became the staunch back for my enthusiasm.

Thanks are due to Prof. R. C. Bhagat, Head P. G. Deptt. of Zoology and Dean Faculty of Sciences for providing me adequate laboratory and library facilities in the department during this programme.

I acknowledge my thanks to my esteemed teacher Prof. M. Z. Chishti, a noble soul personality for his decent approach of teaching particularly in the field of parasitology.

I also bow my thanks to Prof. G. M. Shah, prof. A. Channa, Dr. N. Azim, Dr. Ulfat, Dr. M. Parveen, Dr. S. Tanveer and other teaching and non teaching members of the department.

I am highly indebted to Dr. Majidah Rashid, Sr. Lecturer P. G. Deptt. of Zoology for her timely encouragement and valuable support, her help and sympathy has been a feed for me from the day I became her student. Undoubtedly thanks are due to Dr. Fayaz Ahmad Reader P. G. Deptt. of Zoology who besides a teacher nourished me with kind thoughts from time to time.

I would like to thank to my intimate friends Feroz, Reyaz, Aijaz, Altaf, Shaheena, and Ayesha for their companionship. They always
Acknowledgements

encouraged me with smile and laughter during ups and downs in the past six years.

God has been kind enough to me by showering the blessings of friendship in the form of some kind friends like Shabnum, she is the one who has purified my ideas whenever I was in wrong thinking, and by decorating my crown with the pearl like friend commonly world calls him Khurshid A. Tariq, a dynamic scientist but a simple human being.

Special thanks are due to my special friend cum brother, Dr. Muzzaffar Nazir (Sameer) for his untiring, continuous, multidimensional, decent, loyal and royal company which has been going on since birth. His company particularly during the present research programme acted as a breeze in hot sunny days and warmth in deep frost day of winter, he acted as a shock absorber for me when ever any trouble came to me, his role in my life and during this research study has been unique and unparallel.

The little and loving efforts in the current research by little angels namely Sharjeel and Sadaf are unforgettable.

During the first year of my Ph. D. programme, I lost the most precious gift of Almighty Allah my Father, he being young, energetic, dynamic personality and my research orienter, he was the one who introduced me the severity of taeniasis in common masses and advised me to work for mankind by helping in the disease management and eradication. After his untimely death, I felt, I can neither restart the research nor my academic career, but it is Almighty Allah" The Greatest of All" Who has bestowed me with such a marvellous and valuable person around whom my life surrounds and sustains. He is none other than my only brother, M. Shafi who besides Allah sustained my every activity and programme. He laughs when I laugh......... and saddens when I am sad; he sponsored this big project of research not only financially but involved himself morally and spiritually to take it to its logical end. I have no words to express gratitude towards him but in simple language my dear brother I say thank you very very much.

It is very nice to be a part of the family were every member has research pursuit, one among them is my only sister in law (Mrs. Masooda Shafi) who besides being the most busy, helped a great deal in the patient management and material collection with utmost courtesy all this aps me to say thanks a lot Didi.
Being the most unfortunate member of my family I made every body to suffer since my childhood but it was my family in particular my two loving sisters who have been helping me with prayers, wishes and what not, to express simply thanks would be a joke, so, I dedicate my life to them.

I am highly thankful to my brother in laws, Mr. Javid Ahmad and Mr. Ab. Hamid for their kind support.

I acknowledge my thanks to my grand mother Mrs. Khadija Rehman who besides imparting education to her family glowed the rural Kashmir with the light of education in early fifties. She also played a great role with my grand father in the society upliftment and literacy by adopting each one teach with fun policy.

Thanks to Almighty Allah for having created me in family where angels live and admire, I am proud to be a part of it. I pay my Sincere thanks to my family members in particular my uncle, Mr. Mushtaq Ahmad, cousins, Nazir Hassan, Bashir Hassan and Nisar Hassan, Mehraj-ud-din, Siraj, Gh. Mustuffa and Mudassir for their help in managing and raising experimental animals.

Thanks are also due to Amin and Yasir for their technical support in the preparation of electronic data and to my uncle M. Shaban for rendering his sincere services.

Last but not the least: I extend my grief to my esteemed teacher Late Dr. Abdul Baqui whom we lost during this research programme. His teachings have brought perfection and accuracy in my live. I pray to almighty Allah to grant him peace in Janat-ul-firdous.

Finally I would like to thank Mr. Gulzar Ahmad and Nazir Ahmad PS to Prof. S. A. Zargar, for typing this thesis.

In conclusion, I put these words here with proud that our research has yielded sweat fruits, which can nourish the mankind in the longer run.
