

Acknowledgements

For a "lesser being", life is often the mercy of someone-else and something-else: so also with me.

And their tomorrows are with someone-else and something-else: so also with me.

It is still vivid in my memory, the days I joined with Dr Haridas, my entry-point to science. He never failed to realize the limitations of the set-up, and to nourish somebody's academic independence. He taught me how to manage a system with less pressure.

..... My gratefulness to him.

I owe far more than what I can express, to Prof. T P Singh. He lifted me to hard-core science, which otherwise I could only imagine. He taught me how to "exploit" all the 24 hours of a day. He taught me how to "tear" a scientific problem. All those two years, I watched him with greedy mind.

..... My gratitude to him.

Prof. Shankar Shasidhar was always considerate; he never turned down any of my requests. He made my stay in the department comfortable.

..... My thanks to him.

Dr. A Srinivasan: A one-stop-shop for all in science. He taught me how much "informed" a scientist should be.

AT KOTTAYAM

I express my indebtedness to Dr G M Kurup, Dr P C Ravindran, Dr M S Latha and Dr Jyothis Mathew for their altruism towards me.

Dr Sadasivan, Dr Jayachandran and Miss Bindu were also very cooperative.

Maya: she saw me through the unfathomed inflictions of time. A pause.

Biboy was always around. My obligations. And to Lal too.

Last-minute helps by Arun, Sunil, Jayashree and Priyanka are duly acknowledged.

Colourful memories of the vibrant days shared by the labmates: Dr Fathima, Dr Benoy, Dr Sreekumar, Jinsu, Arun, Joseph sir, Sunil and the liveliness created by Elizabeth and Gincy. Cheers to all!

I recall the cordial coexistence with Dr Kesavan, Dr Sreekumar, Dr Sreejith, Dr Sanil, Dr Hari, Dr Vasundhara, Latha, Ashok, Denny, Satheesan, Sinilal, Rajesh, Sudheer, Jyothi, Betzy, Anand, as well as Anil, Sandhya, Indu, Suprabha, Sindhu, Liji, Remya, Toji, Madhavan sir and Sr. Elsa.

The cooperation extended by the office- and technical- staff of the School of Biosciences, the central library and various sections of the administrative division of the university, was inevitable in the smooth progression of this research program.

AT The Department of Biophysics, AIIMS

I spent the most poignant part of my life here. It was Param and Sarav who harboured me without any alienation. They supported and cared me. A heart-full of thanks to them.

I remember gratefully the patience taken by Dr Savita Yadav in the initial days to teach me the "new" science. And those last days of collaborative work with Dr Sujatha were wonderful.

Thanks are also due to Dr Sharmista Dey and Dr Punit Kaur.

The encouraging late night discussions with Dr Vikas, elegant suggestions and corrections made in the thesis draft by Dr Mohanti & Vandana, the early days with Dr Gauri & Dr Neelima, fruitful analyses with Javed, helps by Pravindra, the relieving moments with Dr Baskar, long walks with Nagendra, besides, the help, understanding and warm hospitality extended all throughout by Dr Vijayaraghavan, Dr Sonika, Dr Ashok Varma, Dr Uma, Jyoti, Garima, Jabeen, Rajendra, Madhu, Shailly, Jayshankar, Lilliput, Vijay, Shweta, Sameeta, Manashi, Saravanan (IIT), Samy, Deepthi, Iram, Shailesh, and Prerna: My acknowledgements to all!

The pain taken by Aklank and Prasad in conducting the CD and computational analyses (respectively) were instrumental in giving the current form to the thesis.

Elsewhere

My sincere thanks to Dr Rajiv Bhat, Jawaharlal Nehru University, for permitting me to conduct DSC experiments in his lab.

I find it difficult to convey my gratitude through letters to Prasanna, who spend above a month for doing the DSC experiments for me. And the company given by Rajesh too.

Dr.N Subharao, Center for Bioinformatics, JNU, was helpful in carrying out the laborious sequence analyses.

Neelan and Binuja at JNU, and Dr R S Sharma at Delhi University are also to be acknowledged for their favours.

The most welcoming and helping support given by the faculty and other staff of the Center for Pig Breeding and Reproduction, College of Animal Sciences and Veterinary Medicine, Mannuthy, as well as that by Dr Kannan, was the key factor in bringing out this project through completion. Cooperation extended by Dr Ajayakumar and Dileep had made my purpose more easy at Mannuthy.

The financial support extended by Mahatma Gandhi University and UGC is also cited.
