ACKNOWLEDGEMENT

This thesis is the end of my journey in obtaining my Ph.D. I would like to thank all those people who made this thesis possible and an unforgettable experience for me.

At this moment of accomplishment, first of all I pay homage to my supervisor Dr. Deepak Pathania for their guidance, continuous encouragement and advice throughout the course of my research work. I am very much thankful to him for picking me up as a student at the critical stage of my Ph.D. I have been blessed by their continuous moral support, invaluable inputs and suggestions when I needed the most. His keen sense of scientific temperament was a source of inspiration to me which could materialize only due to his mature counsel, constructive suggestions and honest criticism.

I wish to express my deep sense of gratitude to my co-supervisor Dr. Harpreet Kaur, Assistant Professor, Punjabi University, Patiala, for skillful scientific guidance, who always supported my research effort, during the long period time of this project. Without her enlightenment and guidance, this work would not be completed. She is one of the best teacher, who always helping me to wake up a strong person inside me and for his “words and decisions” which made me stronger in my academic life. I would like to thank Rajvir who as a good friend, was always willing to help me. She always supporting me and encouraging me.

I am extremely grateful to Dr. P. K. Khosla, Vice Chancellor of Shoolini University, Solan, for his constant support, blessings and co-operation that helped me to accomplish my thesis with determination.

I would like to present my special thanks and deep sense of gratitude to Dr. B. K. Kapur, former HOD of chemistry, Shoolini University, Solan, for his unlimited support for the experimental requirements.

I would like to extend all my gratitude to my all faculty members of school of chemistry and lab assistant Dr. Gaurav Sharma, Dr. Amit Kumar, Anil Chauhan, Balwant Kumar, Mohan Kumar. I am glad to express my appreciation to Vinod Chaudhary, Application Scientist (HRTEM Facility Lab), at NIPER, Mohali for the high quality TEM images throughout my PhD thesis.
I may be failing in my duties if I do not thank all my batch mates for their constant encouragement. I would more than ever like to thank Bhawana Sood, Kamini Kanwar, Poonam Thakur, Neha Gurjeet and Sarita Kango for her constant help throughout my work.

I am deeply grateful to my dear parents, for their unrestricted support throughout my whole life and their perpetual encouragements. I dedicate this thesis to my parents who showed me the correct path in my life, supported me with endless love and affection and built confidence in me. They were there for me everytime in my “ups and downs” and their words encouraged me a lot to achieve my goal. My father, Mr. Anil Singh Katwal, is the person who always supported me for my educational decisions since I was a child. My mother, Mrs. Sunita Katwal, is the one who raised me with her endless love. It would not have been possible to accomplish this thesis without them.

At the end, I would like to express great appreciations to my beloved husband Mr. Vikram Patial, is one who gave me best support that no one else can give. His prayer for me was what sustained me so far. Thank you for being a better half of my life.

I wish I could mention each individually. I am thankful to all those who directly or indirectly contributed in this work and because of whom this work experience and wonderful journey shall remain everlasting and cherished forever in my sweet memories.

Every effort is motivated by an ambition and all ambitions are backed by the strength given by God, a constant source of positive energy. Words are short to express my deep gratitude to Most Gracious Almighty for His hidden presence, help and strength throughout my life.
