Acknowledgments

It perhaps would have remained a dream of mine to accomplish this project of myself without an upper hand and grace of Almighty. At first, I bow my hand in front of Almighty for being so much generous to me and showing solidarity with me, at the time of crisis when I am in desperate need.

Accomplishment, Achievement and Attribute are three important A’s that each and every person requires in life. However, without the blessings of Gurus, it always remains impossible. Every effort is motivated by an ambition and all ambitions have an inspiration behind the height of reaching milestone.

I feel greatly enlightened to get training from my guide “Dr. Anuradha Sourirajan, Associate Professor, Shoolini University, Solan, with her experience, knowledge and zeal to attain more, I am showered and been able to accomplish this project. The present study could not have taken the concrete shape without the help of my guide. I am grateful to her for her illuminating guidance, efforts, co-operation and interest during my project.

I extend my gratitude to Dr. D. R. Sharma for his research advice.

I am highly obliged by the noble gesture of Dr. Kamal Dev, Shoolini University for giving me the opportunity to explore in-depth knowledge and new avenues occurring in the field of Biotechnology and his constant support in my research work.

I am extremely thankful to the Vice chancellor Prof. P.K. Khosla of Shoolini University for providing me the opportunity to work in the inter-disciplinary scientific environment.

I express my heartfelt gratitude to Miss Shruti Kashyap for collecting fern samples from different places of Solan.
I owe my sincere gratitude to Mr. Anil Thakur and Dr. Rakesh Kumar Shukla for helping me in analysis of HPLC and correlative data results. I also owe my sincere thanks to all the research scholars in the School of Biotechnology for their help during experimentation. At last I would also like to thank Miss Lovlesh (Technical assistant) and Mr. Jai Singh (Lab-attendant) for their support during my tenure.

I would like to express my thanks from the intense depth of my heart to my parents and my brother, who graciously overlooked my absence and showed an unflinching support, patience, buoyancy and constant encouragement during the gestation period of my project.

ABHISHEK SHARMA
