ACKNOWLEDGEMENTS

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of hard work whereby I have been accompanied and supported by many people, their wishes and blessings. It is a matter of great pleasure for me that now I have an opportunity to thank all of them.

First of all, I would offer heart-felt gratitude and sincere thanks to my supervisor Dr. Amber Srivastava, Professor, Department of Mathematics, Swami Keshvanand Institute of Technology, Management and Gramothan, Jaipur. I have known him as a sympathetic and principled person. His enthusiasm and commitment to providing ‘only high-quality work and not less’, has made a deep impression on me. His in-exhausting energy and enthusiasm in research have also been highly motivating. His truly scientist vent of mind has made him a constant oasis of ideas in mathematics, which always inspired and enriched my growth as a student, a researcher and a scientist. He challenged me to set my benchmark even higher and to look for solutions to problems rather than focus on them only. I am indebted to my mentor for his infallible guidance, detailed and constructive comments, unflinching encouragement, perceptiveness and untiring efforts.

I express my deep and sincere gratitude to Prof. K. C. Gupta, Professor Emeritus, Department of Mathematics, MNIT, Jaipur, Prof. R. N. Jat, Head, Department of Mathematics, University of Rajasthan, Jaipur, Prof. P. R. Sharma, Former Head, Department of Mathematics, University of Rajasthan, Prof. K. C. Sarangi, Former Head, Department of Mathematics, University of Rajasthan Jaipur, Prof. Mridula Garg, Department of Mathematics, University of Rajasthan for their consistent encouragement and valuable suggestions during the entire work.
A Study of Fractional Calculus Operators and Integrals Pertaining to Certain Special Functions with Applications

I would like to express my sincere thanks to Dr. K. C. Jain, Professor, Department of Mathematics, MNIT, Jaipur for their knowledgeable and inspirational sessions and encouragements throughout the research work.

Acknowledgements will never complete without my expressing heartfelt gratitude and indebtedness to my parents Shri Manbhar Dayal Bhargava and Smt. Asha Rani Bhargava and in-laws Shri Laxman Prasad Bhargava and Smt. Santosh Bhargava for their unflagging love, care and support throughout my life. This thesis would have been simply impossible without their blessings. They worked industriously and despite many hardships in life, spared no efforts in providing the best possible environment for me.

Words fail in expressing my appreciation for my loving wife Anisha, whose dedication, love and persistent confidence in me, has taken the load off my shoulders. She has always encouraged me to expand my thinking. I owe her for unselfishly letting her intelligence, passions, and ambitions combine with mine. Without her encouragement and understanding it would have been impossible for me to finish this work.

It's time to start on that list of things to do – “yes, after your thesis, papa.” In this context my ten year old son Mehul and four year old daughter Kyana (Gauri) needs a special mention. My special gratitude is due to my sister Preeti & brother in law Anshul, brother in law Ashwini & sister in law Vrushali and their families, as well, for their loving support.

I admire the persistent and meticulous attitude of Dr. Rohit Mukherjee, Professor, Department of Mathematics, Swami Keśvanand Institute of Technology, Management & Gramothan, Jaipur, who accompanied me in this process of learning and made himself available for providing support at every step in spite of his hectic schedule, without which this work would not have been completed. He looked closely at the final version of the thesis and offered suggestions for its improvement. No amount of thanks seems sufficient for his support and time.

My sincere thanks are due to my friend Sushil Ambardar for his constant encouragement and valuable suggestions.

I extend my deep sense of gratitude and respect towards honorable Dr. S. M. Seth, Chairperson, Poornima University and Chairman, Poornima Group of Colleges for his continuous inspiration and motivation for the research.
A Study of Fractional Calculus Operators and Integrals Pertaining to Certain Special Functions with Applications

My sincere thanks are due to Shri Shashikant Singhi, Secretary, Shanti Education Society & Director General, Poornima Foundation, who has established Poornima University and given us an opportunity to undergo research work in the renowned name “Poornima” as a brand name.

I extend my sincere thanks to Dr. K. K. S. Bhatia, Vice Chancellor, Poornima University, Jaipur, for his continuous support and encouragements throughout the research work.

I owe special thanks to Dr. Rakesh Duggal, Campus Director, Poornima Group of Institutions, Jaipur, Dr. Manoj Gupta, Dean, School of Engineering & Technology and School of Basic and Applied Sciences, Poornima University, Jaipur Dr. Mahesh M. Bundele, Coordinator Research, Poornima University, Jaipur, Dr. Chandni Kriplani, Registrar, Poornima University, Jaipur, Dr. D. L. Suthar, Professor, Department of Mathematics, Poornima University, Jaipur and Mr. Devendra Somvanshi, Associate Professor, Poornima University, Jaipur for extending all possible facilities and guidance for accomplishing my research work.

I am also grateful to all those who have directly or indirectly contributed in providing me a stimulating environment for accomplishing my task.

Last but not the least, thanks to the Almighty for making my life successful through all the trials and travails. May your name be exalted, honored, and glorified.

May 2015

(Alok Bhargava)
