ACKNOWLEDGMENT

The author feels it to be a privileged pleasure to place on record his deep sense of gratitude and indebtedness to Dr. T.S. Ramanatha Ayyar, Director of Technical Education, Kerala State (Formerly Principal, Professor and Head of the Department of Civil Engineering, College of Engineering, Trivandrum) and Dr. N. Ramachandra Rao, Professor of Computer Applications, Institute of Management in Government, Trivandrum (Formerly Professor of Civil Engineering, College of Engineering, Trivandrum). It was under their inspiring guidance, the work reported in this thesis was carried out. The author is for ever grateful to them for their encouragement, suggestions and discussions at all stages of the research programme.

The author acknowledges his thanks to Dr. R.P. Rajagopalan Nair, (Formerly Assistant Professor, College of Engineering, Trichur) for the useful discussions during the preparation of the thesis.

He is very grateful to Mr. K.V. Valsarajan, Professor of Civil Engineering, College of Engineering, Trivandrum, for the sincere efforts he has taken in the preparation of the thesis.

It is acknowledged with great pleasure, the assistance given by the staff of the Soil Mechanics and Foundation Engineering, Structural and Strength of Materials
Laboratories of College of Engineering, Trivandrum during the experimental study.

The author is thankful to the Government of Kerala for sanctioning leave for doing research and to the Council of Scientific and Industrial Research for granting a fellowship to him during this study.
