ACKNOWLEDGEMENTS

With limitless humility and modesty, I would like to praise and thank "Allah" the Almighty, the merciful, the compassionate, who blessed me with health, patience, enthusiasm and lot of courage to complete this research programme.

It is indeed a great privilege for me to acknowledge my deep sense of gratitude to my revered supervisor Dr. Syed Tanveer for her dynamic and incessant guidance, constructive criticism, inspiring attitude and valuable suggestions throughout the present endeavour. Her forbearance and understanding has enabled me to take this research programme to its logical conclusion.

I am highly indebted to my co-supervisor Prof. M. Z. Chishti for his scholarly sympathetic and able guidance, expert views and sustained interest during the entire research programme. The unreserved help, continued persuasion and genuine interest shown by him in completion of this work are duly appreciated.

I wish to express my earnest appreciations and deep gratitude to Prof. G. Mustafa Shah (Head Department of Zoology) for providing adequate laboratory facilities during my experimental work.

The author wishes to acknowledge all the esteemed teachers of the Zoology Department for valuable suggestions, encouragement and timely help.

No words would be sufficient enough to owe my deepest and sincere thanks to Dr. Fayaz Ahmad, Reader, Department of Zoology, for his affectionate guidance, enthusiastic encouragement, competent suggestions, co-operation and generous help.

The author wishes to express his thanks to the Chief Librarian, Indian Veterinary Research Institute (IVRI), Bareilly (UP), for the adequate supply of literature.

The author would like to express his grateful thanks to Prof. G. M. Bhat, Director University Scientific Instrumentation Centre (USIC) and Mr. Tanq Ahmad (SICM
Technician) for their whole hearted co-operation while performing the scanning electron microscopy of the helminths studied herein.

My worthy fellow scholars and friends also deserve special gratitude and appreciation for their constant encouragement, priceless help and benign co-operation throughout the course of the present study.

I would be failing in my duty if I do not express my deep sense of gratitude to the non-teaching staff of the Zoology Department for their timely help.

Last but not least, I am deeply indebted to my esteemed parents and family members who stood in good stead during my moments of stress and depression and whose blessings, constant inspiration, encouragement, immense love and support provided me an incentive for completion of this research programme. It would be incomplete and inconvenient if I do not owe special gratitude and appreciation to my loving Papa Ji who acts as a backbone for me and always inspires and encourages me to achieve the best, and without whose inspirations, support and enthusiastic encouragement it would have been impossible for me to complete this research programme.

Feroze Ahmed Dar
