Acknowledgements

Beginning with the name of Allah, the Compassionate, the Merciful, Who created and sustains the world, The Sage who endowed tongue with speech, peerless is He and His kingdom is eternal; I would like to take the opportunity to acknowledge my deep indebtedness to all those who made this work worth achievable.

First and foremost I gratefully acknowledge my supervisor Dr. Fayaz Ahmad for giving an opportunity to work on this interesting subject and for his encouragement, helpful guidance and expertise. At times the suggestions seemed to be critical but in long run they proved to be constructive criticism.

I would like to express my thanks to Prof. M. Z. Chishti my Co-supervisor. His thoughtful comments, encouragement and suggestions have been of immense help to me.

My sincere thanks are rendered to Prof. R. C. Bhagat, the Head P. G. Department of Zoology, for providing basic laboratory and chemical facilities.

I also acknowledge the teaching and non-teaching faculty of our department for providing the necessary help during this research.

I feel quite proud to acknowledge my friends and colleagues whose friendship is highly commendable. Their friendship was not only of immense value, but also a great support to me during the present work.

My special thanks go to my intimate friend and roommate Ayesha, for helping admirably from the very beginning of this study. She gave constant support and encouragement during the whole period of this research.

I would like to thank a very good friend Khusreer, who was working in the same laboratory in which I did. I learned a lot from his dedication and valuable suggestions. His kind help and encouragement were of great help during my study.

I also wish my heartfelt thanks to other friends Ajaz, Faruz, Lateef, Shabnum, Imtiaz and others for their help, encouragement and friendship.

I express my warm thanks to my family members for their patience, support and unconditional love throughout my study. I could not attend to my family and relatives properly over the course of this work, still they supported and encouraged me in every possible way at each step of my study.

I am also highly thankful to ICAR New Delhi for providing financial support in the form of Senior Research Fellowship.
