LIST OF FIGURES

Fig. 4.2.1 Hofstede’s Cultural Dimensions – India............................54
Fig. 4.4.1 Possibilities for Collectivism vs. Individualism ......................64
Fig. 4.4.2 Possibilities for Uncertainty Avoidance ................................64
Fig. 4.4.3 Possibilities for Indulgence vs. Restraint ...............................65
Fig. 4.4.4 Ethnic Orientations ..........................................................65
Fig. 6.2.1 MSME-Type of location ....................................................82
Fig. 6.2.2 MSME-Type of enterprise ..................................................82
Fig. 6.2.3 MSME-Type business .........................................................83
Fig. 6.3.1 Fitted Mean of performance variable across States .................87
Fig. 6.3.2 Fitted Mean of Performance variable across enterprise ...........87
Fig. 6.3.3 Fitted Mean of Performance variable across State-location
types ...............................................................................................88
Fig. 6.3.4 Fitted Mean of Performance variable across
type types ..........................................................................................88
Fig. 6.3.5 Fitted Mean of Performance variable across
type business types ............................................................................89
Fig. 6.3.6 Performance variable across State-enterprise
type types ................................................................................................89
Fig. 6.3.7 Fitted Mean of Performance variable across
State-business types .............................................................................90
Fig. 6.3.8 Fitted Mean of Performance variable across
location-enterprise type .........................................................................91
Fig. 6.3.9 Fitted Mean of Performance variable across
location-business types .................................................................91
Fig. 6.3.10 Fitted Mean of Performance variable across
enterprise-business types .......................................................................92
Fig. 6.3.11 Fitted Mean of Performance variable across
Interactions of Segments .......................................................................92
Fig. 6.4.1 Fitted Mean of Power Distance across States .........................95
Fig. 6.4.2 Fitted Mean of Power Distance across location
type types ............................................................................................95
Fig. 6.4.3  Fitted Mean of Power Distance across enterprise
-business types .................................................................96
Fig. 6.4.4  Power Distance across all Eight MSME Segments ..........97
Fig. 6.4.5  Fitted Mean of Risk-taking Propensity across
location types .....................................................................97
Fig. 6.4.6  Fitted Mean of Risk-taking Propensity across
State-location types ...........................................................98
Fig. 6.4.7  Fitted Mean of Risk-taking Propensity across
State-business types ............................................................98
Fig. 6.4.8  Fitted Mean of Risk-taking Propensity across
teach-2-business types .......................................................99
Fig. 6.4.9  Fitted Mean of Risk-taking Propensity across
States ...................................................................................99
Fig. 6.4.10  Risk-taking Propensity across all Eight MSME Segments.....100
Fig. 6.4.11  Fitted Means of Collectivism across States .......................101
Fig. 6.4.12  Fitted Mean of Collectivism across all Eight MSME
Segments .............................................................................101
Fig. 6.4.13  Fitted Mean of Masculinity across States .........................102
Fig. 6.4.14  Fitted Mean of Masculinity across State-location
types ...................................................................................103
Fig. 6.4.15  Fitted Mean of Masculinity across State-business
types ...................................................................................103
Fig. 6.4.16  Fitted Mean of Masculinity across all Eight MSME
Segments .............................................................................104
Fig. 6.4.17  Fitted Mean of Pragmatic Orientation across States ..........104
Fig. 6.4.18  Fitted Mean of Pragmatic Orientation across all Eight
MSME Segments ..................................................................105
Fig. 6.4.19  Fitted Mean of Indulgence across enterprise types ..........105
Fig. 6.4.20  Fitted Mean of Indulgence across business types ..........106
Fig. 6.4.21  Fitted Mean of Indulgence across location-business
type segments ....................................................................106
Fig. 6.4.22  Fitted Mean of Indulgence across States .........................107
Fig. 6.4.23  Fitted Mean of Indulgence across all Eight MSME
Segments .............................................................................107
Fig. 6.4.24  Fitted Mean of Ethnic Orientation across location-business types ........................................108
Fig. 6.4.25  Fitted Mean of Ethnic Orientation across location-enterprise-business types ........................................109
Fig. 6.4.26  Ethnic Orientation across States ........................................109
Fig. 6.4.27  Ethnic Orientation across all Eight MSME Segments ..........110
