CONTENTS

CHAPTER 1: INTRODUCTION ................................................................. 1-17
1.1 Introduction to ICT ................................................................. 1
1.2 Rationale of study ................................................................. 4
1.3 Role of ICT in education ............................................................ 6
1.4 ICT development at school level ................................................. 8
1.4.1 Models and tools for knowledge transfer ......................... 9
1.4.2 Benefits of ICT based Model .............................................. 9
1.4.3 Challenges in implementing ICT .................................... 11
1.5 Impact and factors of ICT in teaching and learning ................. 12
1.5.1 Impact of ICT on pupil ..................................................... 13
1.5.2 Factors affecting the implementation of computers in school 14
1.6 Objective of study ............................................................... 16
1.7 Limitations of study ............................................................. 17

CHAPTER 2: REVIEW OF LITERATURE .............................................. 18-24

CHAPTER 3: RESEARCH METHODOLOGY ........................................ 25-33
3.1 Data sources ................................................................. 25
3.2 Questionnaire design .......................................................... 25
3.3 Data collection ................................................................. 25
3.3.1 Distribution on the basis of region of school ................... 26
3.3.2 Distribution on the basis of type of school ....................... 26
3.3.3 Distribution on the basis of gender of student ................. 27
3.3.4 Distribution on the basis of merit of student ................... 28
3.4 Steps of hypothesis testing ..................................................... 29
3.4.1 State the hypothesis ....................................................... 29
3.4.2 Set the criterion for decision ......................................... 29
3.4.3 Compute the test static .................................................. 30
3.4.4 Make a decision .................................................................31
3.5 Demographic details on data collection.................................................31
3.5.1 Distribution on the basis of region of school (urban/rural).....31
3.5.2 Distribution on the basis of type of school (private/govt.)......32
3.5.3 Distribution on the basis of gender of student (male/female)...33
3.5.4 Distribution on the basis of merit of student (low/high) ........33

CHAPTER 4: ANALYSIS AND INTERPRETATION OF DATA... 34-125
4.1 Analysis based on region of student...........................................35
4.2 Analysis based on type of school.............................................54
4.3 Analysis based on gender of student.........................................73
4.4 Analysis based on merit of student...........................................92
4.5 Analysis based on the performance of students......................112

CHAPTER 5: RESULTS, CONCLUSIONS & SUGGESTIONS... 126-130

CHAPTER 6: METHODS SUGGESTED FOR IMPLEMENTATION
OF ICT IN EDUCATION.........................................................131-143

7. REFERENCES ..............................................................144-153
8. APPENDICES ..................................................................154-163
