CONTENTS vii

LIST OF FIGURES ix

LIST OF NOTATIONS x

1 INTRODUCTION 1

1.1 Review of literature ............................................ 2

1.2 Review of main results ........................................... 7

2 PRELIMINARY DEFINITIONS AND BASIC RESULTS 12

2.1 Definitions and results of poset .............................. 12

2.2 Definitions of graph theory ................................. 16

3 PROPERTIES OF ZERO-DIVISOR GRAPH WITH RESPECT TO
SEMI-IDEALS OF POSETS 23

3.1 Topological Space of Spec($P$) .............................. 23

3.2 Semi-ideal based zero-divisor graphs ....................... 32
4 POSET PROPERTIES DETERMINED BY THE SEMI-IDEAL-BASED ZERO-DIVISOR GRAPH
  4.1 Poset properties for a single vertex of $G_I(P)$ ................................... 40
  4.2 Properties of poset $P$ as $G_I(P)$ is a generalized tree ......................... 53

5 DIAMETERS OF SEMI-IDEAL BASED ZERO-DIVISOR GRAphs
  FOR FINITE DIRECT PRODUCT OF POSETS ............................................. 57
  5.1 Preliminary ................................................................. 57
  5.2 Properties of direct product of posets .......................................... 58
  5.3 Properties of $G_I(P)$ ...................................................... 60

6 GENERALIZED SEMI-IDEAL-BASED ZERO-DIVISOR GRAPH
  OF POSETS ........................................................................... 70
  6.1 Examples of $\hat{G}_I(P)$ ................................................ 71
  6.2 Properties of $\hat{G}_I(P)$ ................................................ 72
  6.3 Topological properties of $V(G_{\hat{P}}(P))$ ................................. 84

CONCLUSIONS AND SUGGESTIONS FOR FURTHER RESEARCH .................. 87

REFERENCES ................................................................. 88

LIST OF PUBLICATIONS .................................................. 95

CURRICULUM VITAE ................................................... 97
