ACKNOWLEDGEMENTS

With immense pleasure, I avail this opportunity to express my profound gratitude to my revered guide Dr. Aparna Khanna (Dean, School of Science, NMIMS University, Mumbai) who has supported me throughout this work with her patience and knowledge whilst allowing me the room to work in my own way. She is my supervisor who kept a sense of humour when I had lost mine. Her maddening attention to detail drove me to finally learn to punctuate prose and whose selfless time and care were sometimes all that kept me going. I feel the inadequacy of words to express my deep sense of gratitude towards her.

I express my immense debt of gratitude to Dr. Nancy Pandita (Professor, Department of Chemical Sciences, School of Science, NMIMS University, Mumbai), for guiding my research for the past several years and helping me to develop my background in phytochemistry offering much advice and insight throughout my work.

I wish to express my sincere thanks to my doctoral committee member Dr. Krutika Desai (Associate Professor, Mithibai College, Mumbai University, Mumbai), for her encouragement and useful suggestions.

I express my special thanks to Dr. M. N. Welling (Pro-Vice Chancellor, NMIMS University, Mumbai) and Prof. Sunil Shirvaiker (Associate Professor, Department of Statistics, School of Science, NMIMS University, Mumbai) for taking out the time in guiding me for this work and developing my deep interest and understanding in statistics.

I was fortunate to have advice, constructive suggestions, untiring help and constant interest in my work throughout this study from Dr. Dhananjaya Saranath (Professor Emeritus, NMIMS University, Mumbai). Her insightful comments and constructive criticisms at different stages of my research were thought-provoking and
helped me focus my ideas. I am grateful to her for engraining me to a high research standard and enforcing strict validations for each research result.

I consider myself lucky to be able to work with Dr. Ashok Bhagwat (Director, Shri C. B. Patel research centre, Mumbai) during the initial phase of my work; whose belief, discipline, principles, simplicity, caring attitude, provision of fearless work environment and confidence in me has given courage to follow my dreams in the arena of research.

I wish to express my heartfelt gratitude to Dr. Purvi Bhatt (Assistant Professor, Department of Biological Sciences, NMIMS University, Mumbai), who has always been encouraging and helpful since my days of post-graduation. She has been inspiring and supportive, and has been always there to listen and give advice.

Madhura Joshi and Karuna Kumar A, (Instrument in-charge, Sophisticated Analytical Instrument Facility, IIT Bombay) quite simply, taught me how to think about treating the tissue culture samples for flow cytometry analysis and made me use the facility available with utmost understanding and high applicability. I am indebted to Nithya Jagannathan, Shreeda Adhyapak, Kanchan Tiwari and my other fellow colleagues at P. S. Ramanathan Advanced Instrumentation Centre, Ruia College, for several discussions that helped me focus on performing analytical work, its interpretation and documentation on the herbal sample used in this work.

I would like to acknowledge the non-teaching staff of School of Science for all the assistance they’ve given throughout my years of research.

Animesh Deval has been a true friend. He has always listened when I needed to talk; and the care, discipline, and organization that he brings to his work have had a beneficial effect on my work. Moreover, he is the only doctoral fellow I have known who never ever whines. This has not stopped me from whining in his presence, but it may have slowed me down a bit. I have also shared many great conversations with Vinita Apraj, Sweta Jha, Viraj Gala and Nirmala Thakur. Riddhi Jholapara, Viraj Yele, Purva Sanganeria, Akshata Raut, Mayuri Pillai and Krishna Deshpande have been my friends and great colleagues. A cup of coffee shared with them every
morning has always been the time well spent. Priyanka Kapase, Akshay Kamath, Madhvi Shrimankar and Amruta Solanki have been huge support and great friends from the Department of Statistics.

Last, but by no means least, I thank my friends Dhwani Tanna, Hemkashi Mehta and Chirag Shah for their love, support and encouragement throughout. I have been blessed to have them as my backbone, who have always shared my anxiety and restlessness and praised and applauded to boost my morale, persistently. I thank them for being there, and making me laugh when I had almost forgotten to.

For any errors or inadequacies that may remain in this work, of course, the responsibility is entirely my own.

Date: July 31st, 2014
