ACKNOWLEDGEMENT

It is my prime duty to express my gratefulness to the Almighty for his blessings. Without his divine grace and blessings, nothing would have been possible.

I feel pride to express my sincere thanks and deep sense of indebtedness to my research supervisor Dr. R. Krishnamoorthy, Professor of Computer Science and Engineering, Annamalai University, for suggesting this topic and for his valuable guidance, many fruitful discussions and constructive encouragement throughout the study and preparation of this thesis.

I humbly place my sincere thanks to Prof. B. Palaniappan, Professor and Head, Department of Computer Science and Engineering, Dean, Faculty of Engineering and Technology for permitting me to successfully carry out this research investigation.

I would like to express my sincere gratitude to Dr. D. Venkatesan, Reader in Statistics, Annamalai University for his valuable discussion and suggestions are part of this research work.

I also express my thanks to Mr. R. Swaminathan, Spl. Grade Instructor, Department of Computer Science and Engineering, Annamalai University for his constant encouragement and help in various aspects.
But for the sterling support of my family, I would not have been able to complete this research work. I am profoundly indebted to my wife S. Vijayalakshmi and my beloved sons Vigneshwaran and Dharaneeswaran for letting me occupy, for a spell, my own existential apace away from them.

K. SEETHARAMAN
