LIST OF TABLES

Table 2.1 Different Substrates used in MFCs 34
Table 3.1 Conductivity of Graphite Plate Measured by Four-Point Probe Analysis 58
Table 3.2 Conductivity of Graphite Rod Measured by Four-Point Probe Analysis 58
Table 3.3 Composition of Artificial Wastewater 1 59
Table 3.4 Composition of Artificial Wastewater 2 59
Table 3.5 Final Composition of Artificial Wastewater 60
Table 4.1 Physico-Chemical Characteristics of ADDW 67
Table 4.2 The Morphological and Physiological Characteristics of Bacteria Isolated from ADDW 68
Table 5.1 Box–Behnken Experimental Design with Coded Values 77
Table 5.2 Effect of Anode Surface Area on Voltage, Current and Other Parameters 80
Table 5.3 Effect of Cathode Surface Area on Voltage, Current and Other Parameters 81
Table 5.4 Effect of Cathodic Chamber Aeration on Voltage, Current and Other Parameters 84
Table 5.5 Values chosen for the Box–Behnken design Variables 88
Table 5.6 Box–Behnken Design with Actual (coded) Values and Resultant Total Power Generation 88
Table 5.7 Analysis of Variance for the Fitted Quadratic Polynomial Model 89
Table 5.8 Comparison of Power Outputs in MFCs Supplied with Defined Substrates 94
Table 6.1 Analysis of pH, Dissolved Oxygen and Viable Count 105
Table 6.2 Morphological Characteristics of Isolates 110
Table 6.3 Biochemical Characteristics of Isolates 111
Table 6.4 Identification of the Three Isolates 113
Table 6.5 Identification of DNA Bands Analysed by DGGE with Scoring, Homology, and Accession Numbers (obtained from NCBI) 117
