CONTENTS

CHAPTER 1  INTRODUCTION

1.1 Importance of Single Crystal 1
1.2 Classification of Crystal Growth 6
  1.2.1 Solid state growth 7
  1.2.2 Vapour phase growth 7
  1.2.3 Solution growth 8
  1.2.4 Melt growth 11
1.3 Introduction to Nonlinear Optics 13
1.4 Theory of Nonlinear Optics 14
1.5 Nonlinear Optical Crystalline Materials 17
1.6 Developments in NLO Materials 20
  1.6.1 Organic NLO crystals 20
  1.6.2 Inorganic NLO crystals 23
  1.6.3 Semiorganic NLO crystals 27
  1.6.4 L-arginine derivative crystals 30
1.7 Present Study 41

CHAPTER 2  GROWTH, STRUCTURE AND CHEMICAL COMPOSITION

2.1 Low Temperature Solution Growth 44
  2.1.1 Solution and solubility 44
  2.1.2 Expression of supersaturation 46
  2.1.3 Slow cooling method 47
  2.1.4 Slow evaporation method 48
  2.1.5 Temperature gradient method 49
  2.1.6 Crystals grown from solution 49
2.2 Growth of Sample Crystals 50
2.3 Materials Used 51
2.4 Growth of LAA Single Crystals 51
2.5 Growth of Doped LAA Crystals 52
2.6 Characterization Techniques 52
  2.6.1 Single crystal X-ray diffractometer 52
  2.6.2 Powder X-ray diffractometer 55
CHAPTER 5 SUMMARY AND SUGGESTIONS FOR FUTURE WORK

5.1 Summary 163
5.2 Conclusions 165
5.3 Suggestions for Future Work 166

References 167

Appendixes

A. Resume of the Candidate 180
B. Publications By the Candidate 181
C. Indexed PXRD Intensity Data 183
D. Copies of Papers Published in Journals 196
