List of Tables

2.1 Cameras used in experiments and their settings .......................... 53
2.2 Actual readout noise of each camera ................................. 54
2.3 Camera identification results for combined exposure levels ........ 55
2.4 Camera identification results ............................................. 56

3.1 Cameras used in experiments and their properties ....................... 70
3.2 Estimated $k_1$ for each line (from left to right) in Figure 3.8(b) ... 73
3.3 Estimated $k_1$ for each line (from left to right) in Figure 3.9(a) ... 75
3.4 Estimated $k_1$ for each line (from left to right) in Figure 3.9(b) ... 75
3.5 Estimated $k_1$ for each line (from left to right) in Figure 3.9(c) ... 75
3.6 Estimated $k_1$ for each line (from left to right) in Figure 3.9(d) ... 76

4.1 Matching score between Figure 4.6 (query) and each of the images
in Figure 4.7 ........................................................................... 98
4.2 Matching score between Figure 4.8 and different views of source
image2 in Figure 4.9 ................................................................. 101
4.3 Performance evaluation ......................................................... 105

5.1 Face identification rate ......................................................... 116
