Acknowledgements

I deem it a rare opportunity to pronounce my deep sense of gratitude to the tutelary Dr. Lalitha Rangarajan, Reader, Department of Studies in Computer Science, University of Mysore, for her exemplary guidance, which enabled my research work efforts to come in shape with meaningful conclusions. Her great concern and endearing demeanor always encouraged my enthusiasm in research, which otherwise bound to be lackadaisical. Her keen interest in my progress would have been unrequited if I had not heed her remarks of excellence.

It is an incontrovertible fact that the help I received directly or indirectly from everyone, who have made my task easier.
