ACKNOWLEDGEMENT

At the outset I would like to place on record the blessings of GOD without which I would not have been able to complete this work successfully.

My profound gratitude to my Research supervisor Dr. N. MURUGESAPANDIAN, for his valuable suggestions and constructive criticisms rendered at each and every stage of the project. He spent much of his precious time and efforts in guiding and advising me with invaluable suggestions throughout this study. Without his assistance and committed guidance this thesis would not have been completed.

I would like to thank my father Thiru. A. Sethubabu (late) and my mother who sacrificed a lot to provide me a strong educational foundation.

Last but not the least, my wife S. Maheswari, daughter E. Sharmila and my son E. Krishnakanth deserve due credit for their continued support rendered in completion of this thesis.
