ACKNOWLEDGEMENT

I acknowledge, with a great sense of pride and gratitude, the role played by my guide Prof. B Ramachandra in not only assisting me towards this goal but also in helping me achieve things which I never thought that I was capable of. Prof. B Ramachandra’s contribution, from the problem formulation stage right till the final write-up, is immeasurable and I profusely thank him. I really appreciate the enormous time, thought and hard work that he has put in towards my thesis.

My sincere thanks to Sri.Chowdaiah, President, People Educational Trust, Dr. V Sridhar, Principal, PES College of Engineering and Dr. H.S Sheshadri, Dean-Research, PET Research Center, Mandya.

This research work carried out at Center for Nano Science and Engineering (CeNSE), IISc, Bangalore under INUP (Indian Nano Electronics user Program) program. I extend my heartfelt thanks to the INUP Program funded by Department of MCIT (Ministry of Communication and Information Technology), DST (Department of Science and Technology), DRDO and Ministry of Defense, Government of INDIA.

I am ever grateful to Prof. Praveen C Ramamurthy, Materials Engineering Department, IISc, Bangalore, my mentor for his continuous technical guidance and valuable suggestions at various times.

I acknowledge the support and assistance of all IISc-INUP Professors - Dr. S.A Shivashankara, Dr. Navakanta Bhat, Dr. K.N Bhat during the execution of this research work.

My sincere thanks to Prof. Venugopal, Chemical Engineering Department, IISc, for donating Gold Nanoparticle solution at crucial times, without which this research work would not be successful.

I am thankful to research scholars Kaushal Mehta (Bio-Chemistry Department), Miss Ashwini Mallya of Prof. Praveen’s Lab (Materials Engineering), to all the Technical staff and entire INUP Team of CeNSE, IISc, for their selfless help and support in executing this research work.
Dr. Mallikarjuna Babu, our Principal, has supported me at every step and my sincere thanks to him. I am grateful to Dr. G N Sekhar, Vice Principal, for his assistance and cooperation.

I acknowledge the strong inspiration and support provided by the Head of my Department, Prof. Ravishnankar Deekshit, who has provided required laboratory facilities to carry out the work and would like to thank other senior professors, colleagues and friends.

My special thanks to Prof. M.S Dharmaprakash, Prof. Pranesh and Dr. Mahesh, for initiating me at the early stages of my work, which motivated me to carry out the work at Centre for Nano Science and Engineering (CeNSE), IISc, Bangalore, under the INUP Program.

I acknowledge the valuable contributions of our P G students, Chetan Ghatage and Nancy Subhashini for their hard work and efforts in helping me with this research work.

I would like to thank my husband, Sri. B L Joshi and daughter, Ms. Meghana B Joshi, for their encouragement, motivation, selfless service and continuous support since the beginning. Without them, my research work would not have been implemented. I am indeed grateful to them.

I would like to extend my heartfelt thanks to my parents; I think the completion of this thesis is an expression of my gratitude to them.

USHA. A
Research Scholar
