List of Tables

1. Table: 4. 1.1. Mean pre and post- test anxiety scores of cancer patients in Stages II and III 85
2. Table: 4. 1.2. Mean pre and post (after biofeedback) anxiety scores of Cancer patients in stage II and results of paired ‘t’ test 86
3. Table: 4. 1.3. Mean pre and post (after biofeedback) anxiety scores of Cancer patients in stage III 88
4. Table: 4.1.4. Mean reduction in anxiety scores (pre to post) of Cancer patients in stages II and III after biofeedback intervention and results of ‘t’ test 89
5. Table: 4. 2.1. Mean pre and post- test Stress scores of cancer patients in Stages II and III 90
6. Table: 4. 2.2. Mean pre and post (after biofeedback) stress scores of Cancer patients in stage II and results of paired samples ‘t’ test 91
7. Table: 4.2.3. Mean pre and post (after biofeedback) stress scores of Cancer patients in stage III and results of paired samples ‘t’ test 93
8. Table: 4.2.4. Mean reduction in stress scores (pre to post) of Cancer patients in stages II and III after biofeedback intervention and results of independent samples ‘t’ test 94
9. Table: 4. 3.1. Mean pre and post- test anxiety scores of primary caregivers of cancer patients in Stages II and III 95
10. Table: 4.3.2. Mean pre and post (after biofeedback) anxiety levels of primary caregivers of cancer patients in experimental group in stage II and results of paired samples ‘t’ test 96
11. Table: 4.3.3. Mean pre and post (after biofeedback) anxiety levels of primary caregivers of cancer patients in stage III and results of paired samples ‘t’ test 97
12. Table: 4.3.4. Mean reduction in anxiety scores (pre to post) of caregivers in stages II and III after biofeedback intervention and results of independent samples ‘t’ test 99
13. Table: 4. 4.1. Mean pre and post- test stress scores of primary caregivers of cancer patients in Stages II and III 100
14. Table: 4.4.2. Mean pre and post (after biofeedback) stress scores of primary caregivers of cancer patients in experimental group in stage II and results of paired samples ‘t’ test 101
15. Table: 4.4.3. Mean pre and post (after biofeedback) stress scores of primary caregivers of cancer patients in experimental group in stage III and results of paired samples ‘t’ test

16. Table: 4.4.4. Mean reduction in stress scores (pre to post) of caregivers in stages II and III after biofeedback intervention and results of independent samples ‘t’ test

17. Table: 4.5.1. Mean male and female pre and post intervention anxiety scores and result of independent sample ‘t’ test

18. Table: 4.5.2. Mean male and female pre and post intervention difference of stress score and independent sample ‘t’ test

19. Table: 4.6.1. Mean reduction in the anxiety scores of male and female caregivers (experimental group) of cancer patients and results of independent samples ‘t’ test

20. Table: 4.6.2. Mean reduction in the stress scores of male and female caregivers (experimental group) of cancer patients and results of independent samples ‘t’ test

21. Table: 4.7.1. Mean reduction Anxiety score after biofeedback intervention in patients with different levels of education and independent sample ‘t’ test

22. Table: 4.7.2. Mean Stress reduction core after biofeedback intervention in patients with different levels of education and independent sample ‘t’ test

23. Table: 4.8.1. Mean Anxiety reduction score after biofeedback intervention in 'patients with or without surgery' and independent sample ‘t’ test

24. Table: 4.8.2. Mean Stress reduction score after biofeedback intervention in patients with or without surgery difference and independent sample ‘t’ test

25. Table: 4.9.1. Mean reduction Anxiety score after biofeedback intervention in patients with different cycles of chemotherapy and independent sample ‘t’ test

26. Table: 4.9.2. Mean Stress reduction score after biofeedback intervention in patients with different cycles of chemotherapy and independent sample ‘t’ test
