Acknowledgements

I wish to thank and submit my gratitude to Mother Nature and Goddess Sharadadevi for giving me this opportunity to associate with Dr. M.C. Varadaraj during the period of my Ph.D. programme. Without his guidance, assistance and encouragement, this thesis would not have reached to the present stage. My continuous interaction with him has helped me to mould my personality and temperament towards making a research career. With overwhelming humility, I thank him for all the support, guidance and advice.

I wish to thank Dr. V. Prakash, Director, CFTRI, Mysore for permitting me to carry out my research work at this institute. Besides, I would like to thank Dr. Krishnanand, and Dr. M.S. Prasad, Former Heads and Dr. S. Umesh Kumar, Head, Department of Food Microbiology for their support and encouragement during my Ph.D. programme.

My sincere thanks are to Dr. S.V.N. Vijayendra, and Dr. Prakash M. Halami, Scientists, Dept. of Food Microbiology in extending me all their co-operation and encouragement, during my stay in that Department. I am equally thankful to all the Scientists and supporting staff of the Departments of Human Resource Development and Dept. of Food Microbiology for giving all help and required support. It is my duty to thank Head and other staff members of FOSTIS, particularly Mr. I. Ragavan for all their constant help.

My sincere thanks are to the University Grants Commission, New Delhi for awarding me with Teacher Fellowship under Professional Development Scheme to complete my Ph.D. programme.

I owe my sincere thanks and gratitude to Mr. Shivalingsarj Desai, Mrs. Divya K.H. and Mrs. Roopashree, A.N. and other research scholars of HRD and FM who instilled a deep insight in my research work.

My special thanks to my colleagues in the Yuvaraja's College, Mysore, Former Principals and the current Principal for their understanding and moral support in completing
this work. My thanks to Dr. Raghavendra, Retd. Professor of Microbiology, Karnataka University who suggested me to take up teacher fellowship and complete Ph.D. He constantly enquired about the progress of my work. Further, I wish to thank Dr. A. Jagannath, scientist, DFRL, Mysore for all his valuable advice towards making a research career.

I wish to place on record my heartfelt thanks to my father, late Sri. H.R. Sunder Raj who could not live long to see his ambition being fulfilled and all other elderly members in my family who had directly or indirectly supported me in this programme.

My wife, Mrs. K.K. Namitha always stood by me at every stage of my research work, day and night and helped me in all aspects, particularly at the stage of compiling the data and final preparation of the thesis. Her endurance, understanding and strenuous efforts are very much appreciated.

My son, Chi. H.J. Vighnesh and daughter Sou. H.J. Vagdevi were always my stress relievers. They were curious about my work and obliged my instructions with smiling faces and allowed me to go ahead in my stupendous task.

My sincere thanks are to my brother, Dr. H.S. Giridhar and sister-in-law, Dr. Ramya Giridhar and their children, Ms. Gowree and Ms. Siri for their moral support and encouragement.

Words are beyond my reach to express my gratitude to my beloved Mother, Smt. H.N. Mangale, who had been the main guiding force in my task of completing this Ph.D. programme through continuous encouragement and instilling confidence to go ahead.

H.S. Jayanth
