OUTLINE OF THE THESIS PRESENTATION

Ph.D. SYNOPSIS

1.0 INTRODUCTION 01-10

2.0 REVIEW OF LITERATURE 11-118
   2.1 Global scenario of food safety 11
   2.2 Public health microbiology of Listeria spp. 16
   2.3 Characteristics of Listeria species 40
   2.4 Isolation methods of Listeria spp. from foods 56
   2.5 Incidence of Listeria monocytogenes
      (other Listeria spp.) in foods 79
   2.6 Behavioural pattern of Listeria species
      in culture media and foods 92
   2.7 Listeria spp. and microbial food safety 115

3.0 OBJECT AND SCOPE OF STUDY 119-120

4.0 EXPERIMENTAL PLAN, RESULTS AND DISCUSSION 121-215
   4.1 Isolation and characterization of native
      food isolates of Listeria species 121-140
   4.2 PCR detection of selected traits among
      identified food isolates of Listeria spp. 141-158
   4.3 Effect of cultural attributes on the behaviour
      of Listeria spp in culture broths and milk media 159-177
   4.4 Behavioural pattern of Listeria spp. to heat and
      cold treatments 178-200
   4.5 Behaviour of Listeria spp. In milk based foods 201-215

5.0 SUMMARY AND CONCLUSION 216-219

6.0 BIBLIOGRAPHY 220-275
