

List of Tables

1	Table(1)Definition of target costing	112
2	Table(2)Comparison of target costing and cost plus-Approaches	116
3	Table(3)Intellectual foundations of cost Management	117
4	Table(4) Population and Sampling Details:	147
5	Table(5)The distribution of perception on achievement of asking price and achievement of required profit	152
6	Table(6)The distribution of method of cost reduction technique used between two countries.	155
7	Table(7)The distribution of appreciation of factors playing an important role when positioning products in the market between two countries	158
8	Table (8)The correlation of perception of employees on key benefits with the duration of use of cost reduction techniques in both the countries.	163
9	Table (9) The distribution of perception of employees on drawbacks of target costing between two countries	165
10	Table (10) The age distribution of the employees of auto industries between both the countries.	168
11	Table(11)The gender distribution of the employees of auto industries between both the countries.	169
12	Table (12)The distribution of education of the employees of auto industries between both the countries.	171
13	Table (13)The distribution of the type of department of the employees of auto industries between both the countries	172
14	Table (14) The distribution of experience of the employees of auto industries between both the countries.	174
15	Table 15The distribution of education of the employees according to their department type in India.	176
16	Table 16The distribution of education of the employees according to their department type in Libya.	177
17	Table 17 The distribution of method of cost reduction used between two countries.	179
18	Table 18 The distribution of duration of using cost reduction methods between two countries.	180
19	Table 19The distribution of goals to be achieved through the use of cost reduction methods between two countries.	182
20	Table 20The distribution of appreciation of factors playing an important role when positioning products in the market between two countries.	183

21	Table 21 The distribution of involvement of department in the target costing process between two countries	185
22	Table 22 The distribution of departments through which the activities for implementing target costing take place between two countries	187
23	Table 23 The distribution of departments being a main driver of the cost reduction process between two countries.	188
24	Table 24 The distribution of extent at which the suppliers are involved in the cost reduction process between two countries	190
25	Table 25) The distribution of perception of employees on key benefits of target costing between two countries.	192
26	Table 26 The distribution of perception of employees on drawbacks of target costing between two countries.	194
27	Table 27 The distribution of alternative methods adopted for cost targets when it is not achieved in a conventional manner between two countries.	196
28	Table 28 The distribution of perception on achievement of asking price and achievement of required profit between two countries.	197
29	Table 29 The distribution of stage in the manufacturing process at which target costing was applied between two countries	199
30	Table 30 The distribution of perception on having different result if target costing was applied at a different stage in the manufacturing process between two countries	201
31	Table 31 The distribution perception on part of manufacturing process that is difficult to apply target costing method between two countries	202
32	Table 32 The distribution of perception on part of manufacturing process that is easy to apply target costing method between two countries.	203
