ACKNOWLEDGEMENT

I consider it my fortune to have Dr. N. Shyam Kumar, Principal WITS, Warangal and Dr. B. Durga Prasad, Professor and Head, Department of Mechanical Engineering, JNTUA as my supervisors. With their profound knowledge of the scientific innovative in the field of composite materials, they have made my task of characterizing composite materials less difficult.

I extend my deep sense of gratitude to them for constantly advising me and also supporting me from the beginning of my work till its completion.

They gave me practical and timely suggestions which greatly helped me in the successful completion of the work. I extend my pleasure thanks to them for their timely advice and sparing their time to evaluate my work. They made themselves readily available to me whenever I approached them.

I am greatly indebted to Prof. H. Sudarsana Rao, Rector, JNTUA, former Vice Chancellors Prof. K. Lal Kishore and Prof. B. Krishna Gandhi, for giving me a valuable opportunity to study in JNTUA.

I extend my thanks to Prof. S. V. Satyanarayana, Director R & D, JNTUA for conducting review meetings at regular intervals and providing valuable guidance to complete the work.
I thank Dr. C. Mohan Rao, Director Centre for Cellulose and Molecular Biology (CCMB) Hyderabad for permitting to study the SEM analysis of natural fibers.

I thank Prof. R. Velumurgan, Department of Aerospace engineering, IIT Madras for providing training to fabricate composite laminates and mechanical testing facilities of composites at composite technology centre IIT Madras.

I thank Dr. Subramshu Shekar Bhattacharya, Head Sophisticated Analytical Instruments Facility (SAIF) IIT Madras for conducting tests on fibers like DSC, Spectroscopy. I thank Raghavendra Spectro Chemical Laboratory Hyderabad for helping to conduct various mechanical tests.

I sincerely thank Sri Vodithala Satish Kumar, Secretary and Correspondent, KITS Singapuram Huzurabad for constant encouragement and supporting this work. I also thank Dr. K. Shanker Principal, Dr. M. V. Satish Kumar, Head of the Mechanical Engineering Department KITS Singapuram Huzurabad for their kind cooperation. I thank my colleagues Dr. M. Kalyani, Dr. G. Mallaiah, V. Thirupathi, Dr. L. Suvarna Raju and S. Rajendra Prasad for helping to complete my thesis.

I thank Prof. K. Govindarajulu, Principal, JNTUA college of Engineering; I thank all the faculty and staff members of Department of Mechanical Engineering, JNTUA College of Engineering.
Ananthapuramu. for helping me to complete the research work. I thank all the staff members of R & D, JNTUA for giving valuable suggestions to complete the research work. They helped me a lot, whenever I approached them. I also thank Mr. L. Sridhar Reddy, Student Xerox, Anantapur for helping me to complete the thesis printing and binding.

I thank engineering workshop staff of KITS S huzurabad, my all colleagues of KITS S Huzurabad for their cooperation in completing the experimental work and to complete the thesis. I also thank the faculty of Department of Mechanical Engineering of WITS Warangal and SR EC - Waranagal. I thank Dr.V.Mahesh, Dr. P.Sammaiah professors department of mechanical engineering SR Engineering collage Warangal of D.Srikanth Rao of associate professor department of mechanical engineering SR Engineering collage Warangal.

It is my honor to thank my friends, parents, brothers and sisters, without whose support I would not have completed this work.
