ACKNOWLEDGMENTS

In the Name of Allah, Most Gracious, Most Merciful

The Guidance of the supreme has been the Inspiration behind my Endeavours in this Thesis, from Inception to Completion.

I would like to thank all people who have helped and inspired me during my doctoral study.

With sincere feelings, I thank my esteemed supervisor Prof. Naheed Bani, for her expert guidance, and invaluable advice; and for nurturing in me the ability for work, observation and study with her scientific acumen; I cherish her gravity of wisdom, and her infectious buoyancy of spirit, which has always given me a reflective strength in crossing every hurdle in my path. Her critical commentary on my work has played a major role in both the content and presentation of my discussion and arguments.

I would like to thank Prof. Bilqees Bano, Chairman, Department of Biochemistry, for providing all the necessary facilities in the laboratory for my work; and for her constructive counsel.

I express a hearty gratitude to all the faculty members for their goodwill, support and help; for being the fountainhead of knowledge.

I would like to show my gratitude to my all teachers especially Dr. Wajahat for inspiring in me the contemplation of research industry.

My lab mates Nida Suhail and Shirin Hassan deserve the credit of enlivening the lab environment, making it a convivial place to work and lightening my burden with their briskness. The cheering presence of Shafquat and Shoa can never be forgotten. I respect my colleagues Iftikhar, Shakheel, Sandesh, Bader, Amit, Humara and my seniors Ashraf Bai, Shams Bai, Shanawaz Bai, Zohab Bai, Fahad Bai, Atif Bai, Irana Apa, Ayesha Apa, Sabika Apa, Medha Apa, Ruksana and Aua, for inspiring me in research and life through our interactions in the department.

Thanks.

The love and respect extended by my juniors Haseeb, Husain, Ashreeb, Sana, Dilmisheen, Afshan, Maria and Samreen gave me a sense of belonging and I am really very thankful to them.

I am thankful to Faisal, Naveed, Rais, Zeeshan, Kaiser, Wasim, Yasir, Rayees, Ather, Fahim and Masood for their wonderful company, which became a
refreshing oasis for me; for fond memories and teas; and for patiently putting up with all the adjustments to our customary meal-times, and otherwise.

I wish to thank my best friends as an undergraduate; Irfan, Imtiyaz, Shabir, Muzaффar, Altaf, Mudasir, Khalid, and in particular my best friend as a graduate student; Abdul Rouf, for helping me get through the difficult times, and for all the emotional support, camaraderie, entertainment, and caring they provided. Rouf's zealous spirit and scientific fervour spurred me for excellence.

Though my beloved Mother left for heavenly abode in my childhood, yet I know how much I am missing her physical presence. But, I know she is always in my heart, and walking besides me as I make it through the trying days ahead, as well as holding me dearly, as only a mother can do. May she share my joy and happiness in the heaven!

My deepest gratitude goes to my family for their unflagging love and support throughout my life. I am indebted to my Father for his care and love. As an archetypal father in Kashmir family, he worked industriously to support the family and spare no effort to provide the best possible environment for me to grow up and attend school. He had never complained in spite of all the hardships in his life.

My gratitude also lie towards my Sister and Brothers and no words I write here will ever do justice to their invaluable prayers for me; their paramount support, constant encouragement, idealism and profound love has been the most important source of comport and guidance to me; which has been seminal in keeping me anchored to the shore at high tide and of inherent value to me at every step of the way. I deeply cherish the wonderful care of my step-mother, my cousin sisters, uncle, and some first-cousins.

I owe my loving thanks to my wife Henna for her loving and able sense of feelings while compilation of the thesis.

I would be failing in my duty, were I not to mention the very kind assistance of all the non-teaching staff, especially to Mr. Shahanshah, Mr. Yosuf, Mr. Waseem, Mr. Saleem, Mr. Akeel, Mr. Dilshad, Mr. Zuberi and Shahnaz Mam, for well-timed assistance.

Thanks are due to University Grants Commission (UGC) New Delhi, India for financial support and facilities provided by UGC-SAP, DST-FIST and Aligarh Muslim University are gratefully acknowledged.

Nayeem Bilal
