LIST OF TABLES

Table 1. Secondary structure of native, glycated and ROS-glycated HSA as observed by circular dichroism spectropolarimetry

Table 2. UV absorption and thermal denaturation characteristics of native, glycated and ROS-glycated HSA

Table 3. Antigenic specificity of anti-native HSA antibodies

Table 4. Antigenic specificity of anti-glycated HSA antibodies

Table 5. Antigenic specificity of anti-ROS-glycated HSA antibodies

Table 6. Antibodies against native HSA and glycated HSA in diabetic patients’ sera

Table 7. Antibodies against native HSA and glycated HSA in diabetic patients’ sera with secondary complications

Table 8. Antibodies against native HSA and ROS-glycated HSA in diabetic patients’ sera

Table 9. Antibodies against native HSA and ROS-glycated HSA in diabetic patients’ sera with secondary complications

Table 10. Binding of anti-glycated HSA and anti-ROS-glycated HSA antibodies to serum isolated proteins from normal and diabetic patients’ sera

Table 11. Antibodies against native HSA, glycated HAS and ROS-glycated HSA in rheumatoid arthritic patients’ sera
