ACKNOWLEDGEMENT

I express my gratefulness cordially and relishingly to my thesis supervisor, DR. ABRAR AHMAD KHAN, Reader, Department of Applied Mathematics, for his invaluable prompt response and able guidance from the inception to the completion of this research work.

Despite the impossibility of giving credit to everyone who has been of help, I would like to single out certain people who have been especially instrumental, directly or indirectly in the completion of this work.

The professional expertise and perspicuity of my Co-supervisor DR. MURSALEEN, Reader, Department of Mathematics, laced with his keen interest in research, made it a remarkable and unforgettable achievement. For all that, and many others I am grateful to him by the depth of my heart.

It is my privilege to take this opportunity to acknowledge my warmest thanks to Prof. E. Malkowsky from Germany and Prof. A.K. Gaur from Pittsburgh, U.S.A. for their insightful comments and encouragement.

My sincere thanks are due to PROF. TARIQ AZIZ, Chairman, Department of Applied Mathematics for providing necessary facilities.
I express my infinite indebtedness to my parents, brothers and uncle whose love and support are the base of my every success. But parents deserve special mention for bearing the extra burden during the period of my research work with lot of patience.

Finally, special token of deep appreciation to all my friends and colleagues particularly to Mr. Pirzada Shariefuddin, Mr. M. Alyas Khatib, Dr. Shafiullah, Mr. N. A. Shaikh, Mr. Muneer and Mr. Qamaruddin for their generous help and useful suggestions.

TARIQ AHMED CHESTI
