

Acknowledgement

To discover, analyze and to present something new is to venture on an untrodden path towards an unexplored destination is an arduous adventure unless one gets a true torchbearer to show the way. It is my profound privilege to express sense of gratitude to my guide **Dr.N.M.Devashrayee(PG Coordinator, VLSI Design, Institute of Technology, Nirma University)** for their constant guidance, inspiration and encouragement throughout this research work and for their critical reviews during the completion of this thesis. Without him valuable support, I could not have envisaged the successful completion of the thesis. The guidance provided by him has helped me in understanding the subject and associated research element.

I am grateful to members of RPC **Dr.R.A.Thakker**(Professor,VGEC,Chandkheda) and **Dr. D.A. Nagchoudhary**(Professor, DA-IICT, Gandhinagar). I would like to thank Instiute of Technology, Nirma university for allowing me to work on this research topic. My sincere gratitude to Director, **Dr. Ketan Kotecha** for constant help.

My greatest thanks are to all who wished me success especially my parents. I am much indebted to my wife “**Mona**” and son “**Vyom**” for their patience and endless support during this research work.

Above all I render my gratitude to the Almighty who bestowed self-confidence, ability and strength in me to complete this work for not letting me down at the time of crisis and showing me the silver lining in the dark clouds.

Kehul A. Shah
