

**LIST OF TABLES**

	Page No.
1.1 Structural and non-structural proteins of adenoviruses.	5
1.2 Tentative model of fractionation of erythrocyte.	10
1.3 Classification of viruses based on virus erythrocyte interaction.	15
1.4 Non-ubiquitous viral diseases of poultry.	22
1.5 Ubiquitous viral diseases of poultry.	23
1.6 Epidemiology of EDS infection in the poultry.	25
1.7 Summary of the effects of animal viruses on host cell macromolecules during cytotoxic infections.	31
2.1 Buffers for restriction enzyme digestions.	51
3.1 Kinetics of EDS-76 replication in the allantoic cavity of duck embryos.	72
3.1.2 Fractionation of virions and viral particles of EDS 76.	74
3.1.3 Effect of temperature, pH and erythrocyte concentration of the HA activity.	76
3.2.1 Cloning of EDS DNA fragments.	98
4.6.1 Length (bp) of restriction fragments of DNA isolated from viruses Ad1, Ad2, Ad5.	133
4.6.2 Comparison of restriction fragmentation of various strains of adenoviruses.	134
