ACKNOWLEDGEMENT

The author wishes to place on record her deep sense of gratitude to her Supervisor Dr. M. Abdullah Khan, Professor of Electrical Engineering, Anna University for his patient and invaluable guidance throughout the course of this thesis work.

The author thanks to Dr. K. Kuppusamy, Professor, Electrical Engineering for his inspiring and invaluable guidance throughout the course of this thesis work. The author thanks Dr. M. A. Panneerselvam, Director, School of Electrical and Electronics Engineering for his support and encouragement.

The author thanks Dr. G. Sadasivam, Professor of Electrical Engineering for his active support and guidance. The author thanks Dr. S. R. Paranjothi, Dean of Electrical Engineering for his encouragement and timely help. The author thanks the System Study Group, Anna University for providing invaluable sparse oriented algorithms, FORTRAN codes for transient stability package that served as benchmarks and practical system data amongst various others. The author also wishes to thank the computing facility provided at the Power Systems Engineering Division.

The author thanks, Dr. R. Ramanujam, Visiting Professor, Electrical Engineering for his valuable suggestions and encouragement. The author wishes to thank Mr. S. P. Natarajan, Assistant Professor, Annamalai University for taking pains to proof read the author's research papers. The author thanks Mrs. R. P. Kumudini Devi and Mrs. G. Uma, Dr. B. Venkatesh and Mr. S. Chandramohan for providing valuable suggestions and assistance. The author thanks her husband, Mr. P. Ramamoorthy, her son and daughter without whose encouragement and inspiration this thesis would not have come to this shape. Finally, the author thanks all those who have helped her in one way or the other in carrying out this research work.

P. LAKSHMI
