ACKNOWLEDGEMENTS

Few people have cast their enthusiasm and sincerity in research on my making as Prof. Kunthala Jayaraman, Dean, A.C Tech, Anna University has done all these years. I take this opportunity to express my respectful gratefulness to her patronizing spirit which carried me through the period of my Ph.D years. I have found her constant encouragement an inimitable force that keeps the fire aglow my darkest hours of research.

There are very different ways to thank a person who turns out to be more than just a guide, a mentor and a teacher. For me, the responsibility has become arduous as I stand in a position to acknowledge the extent to which my guide Prof. Arun Balakrishnan has taken me in science for the last few years. Even after all these years, he has remained an insupplementable source of motivation for my choosing this field of research and I sincerely thank him for all his involvement and efforts in my work.

I thank Prof. P. Kaliraj, Director, Centre for Biotechnology for his encouragement and for providing me all the facilities to complete my Ph.D. work.

Dr. S. G. A. Rao, CRI, Tata Hospital, Bombay kindly consented to conduct bioassay for the protein samples. Dr. Sayed E. Hasnain, NIL, New Delhi, initiated me into eukaryotic expression. I sincerely thank for encouraging me to a large extent to complete work in a very short time in his lab. Dr. Saman Habib infected me with her straightforward attitude and clean handedness while teaching me baculovirus expression studies. Mr. Niteen Pathak set the ground for me by teaching me the basics for the experiments. I thank them sincerely. I thank Dr. Sankaran, Dr. Gautam and Dr. Narayanan, CBT, for their suggestions and constant encouragements. Dr. Geetha had spared her valuable time in correcting my thesis draft. I thank her for her help.

Ms. Suba has been an affectionate friend over the years in CBT. I have found in her an everhelping companion. She has listening ears, sympathetic heart and helping tendency that made writing the earlier drafts of the thesis easier. Ms. Lakshmi has been resourceful with her constant moral support and an understanding friend in my hours of monetary needs. Ms. Bhavani has been a good friend and I am thankful to her for introducing me to her wonderful family which filled many of my hours away from my own home. I have few words to describe the emotional and moral support from my friends Gopalakrishnan, Xavier, Somu, Raju, Meenakshi sundaram, Anant Achary and Ravi. They have become irreplaceable parts of my life. I thank Messrs. Ghousi and Cecily for their assistance in preparing media. I thank all my colleagues and technicians who have helped me one way or other in my work and stay in CBT. I thank Mr. Srikanth for his invaluable and timely assistance in bringing the thesis to its final and fair draft. I thank CSIR, New Delhi for providing me with SRF during my Ph.D.
