ACKNOWLEDGEMENT

With profound gratitude and reverence, the author wishes to thank her research guide Dr. M. Kaarmegam, Director, Centre for Water Resources, for the great source of inspiration, excellent guidance and unflinching encouragement throughout the research tenure.

Dr. D. Jayalakshmi, Prof. and Head, Dept. of Sociology, University of Madras, introduced the author to Irrigation Sociology. She also served in the Doctoral Committee with Dr. N.V. Pundaraikanthan, Principal, St.Peter’s Engg. College. Both are gratefully thanked for their valuable suggestions and guidance.

Dr. S. Elangovan, Prof. and Head, Dept. of Civil Engineering, for his useful advice and help; Dr. P. Gomathinayagam and Shri. C.R. Balagopal for their constant encouragement and valuable suggestions; and Mr. J. John Paul for his assistance in preparing the thesis, are all greatly acknowledged.

Jawaharlal Nehru Memorial Fund (JNMF) provided scholarship for a period of 1½ year. Ministry of Water Resources, GOI; IWMI, Colombo; TISS, Mumbai; MTI Programme of Wageningen University, the Netherlands; and SaciWATERS, Hyderabad, have all supported financially helping the author to gain access to discuss her problem with several experts. The author wishes to thank all of them.

Thanks are due to: (i) The Director and Staff of the Centre for Water Resources for extending all Centre’s facility; and (ii) The Arachalur Division of the PWD and the LBP WUA, for providing the data.

Last but not the least heartfelt gratitude is due to Mr. M. Selvakumar, brother-in-law who provided invaluable moral support, inspiration and encouragement at all stages of research guided the author to rise to the present level where she is now. Parents, brother and sisters with their family members are all sincerely thanked for constant encouragement and support.

J.D.SOPHIA
