ACKNOWLEDGEMENT

The author wishes to place on record his sincere gratitude to Dr. R. Guruswamy, Professor of Public Health Engineering, Centre for Environmental Studies for his inspiring guidance, constant encouragement, keen interest and lucid suggestions from the very inception to the completion of the work.

The author expresses his gratitude to Dr. R. Pitchai, Director and Professor, Centre for Environmental Studies, for his advice and encouragement in the present work.

The author is extremely thankful to Dr. T. V. Ramakrishna, Professor, Department of Chemistry, I.I.T., Madras and Dr. M. Mariappan, Scientist, CLRI, Madras for their constructive remarks in the progress of the study.

The author is grateful to the College and University authorities for their administrative and financial support and to all other members of staff both teaching and nonteaching who have extended a helpful hand to the author in the successful completion of the thesis work.
