ACKNOWLEDGEMENT

I wish to express my deep sense of indebtedness and gratitude to Dr. A. Kalanidhi, B.E., M.Sc. (Engg.), Ph.D., M.Inst.R.(U.K.), F.I.C.C., Senior Scientific Officer, Department of Mechanical Engineering, College of Engineering, Guindy, Anna University, Madras under whose initiation, expert guidance, help and encouragement this research work was carried out and thesis prepared.

I wish to acknowledge the encouragement of Dr. V. N. Vedamurthy, Professor of Mechanical Engineering, and Dr. M. C. Ramaswamy, Professor of Mechanical Engineering of College of Engineering, Guindy, Anna University, Madras during the course of this work.

My sincere thanks are to Dr. G. Rengarajan, Professor of Low Temperature laboratory, I.I.T., Madras for his untiring help, valuable criticism and suggestions.

I am at a loss for words to express my deep sense of gratitude to Dr. S. M. K. A. Gurukul, Chief Engineer (R&D), Cryogenics division, B.H.P.V., Vizag for his useful and stimulating discussions which helped in clearing the uncertainties relating to the concept of enthalpy potential.

My sincere thanks are to Dr. S. Renganarayanan, Reader in Mechanical Engineering who is incharge of Computer division, Dr. M. Rajendran, Dr. N. Sathyamurthy, Dr. P. Ganasundaram and Dr. K. Sreenivasan of the Chemical Engineering Department of Alagappa College of Technology, Anna University, Madras for their help during the course of the research and in the preparation of the thesis.

My earnest thanks to all the teaching and non-teaching staff members of the Mechanical Engineering Department, College of Engineering, Guindy, Anna University, Madras, for their sincere and wholehearted help rendered during the course of this investigation.
