

CONTENTS

Synopsis	i
I. Introduction	1
1.1 Peristalsis.....	1
1.2 Biological systems Associated with Peristalsis.....	2
1.2.1 Ureters	2
1.2.2 Digestive System.....	3
1.2.3 Male Reproductive Physiology.....	4
1.2.4 Female Reproductive Physiology	5
1.2.5 Transport of Spermatozoa	6
1.3 A brief survey of literature.....	7
2. Peristaltic transport of a conducting fluid in an asymmetric channel	15
2.1 Introduction.....	15
2.2 Mathematical formulation and solution.....	18
2.3 Discussion of the results.....	23
3. Peristaltic flow of conducting viscous fluid in a rotating channel	39
3.1 Introduction.....	39
3.2 Mathematical formulation and solution.....	41
3.3 Discussion of the results.....	45
4. Peristaltic transport of a conducting fluid in a vertical symmetric channel	63
4.1 Introduction.....	63
4.2 Mathematical formulation and solution.....	65
4.3 Discussion of the results.....	70

5. Peristaltic transport of a conducting Bingham fluid in an inclined channel	89
5.1 Introduction.....	89
5.2 Mathematical formulation and solution.....	90
5.3 Discussion of the results.....	95
6. Peristaltic transport of two conducting immiscible fluids in a Channel	108
6.1 Introduction.....	108
6.2 Mathematical formulation and solution.....	110
6.3 The solution for the interface	116
6.4 Discussion of the results.....	117
