	<b>Page No.</b>
<b>CHAPTER - 1 INTRODUCTION</b>	<b>1-29</b>
1.1 Cuprous oxide	7
1.2 Copper aluminum oxide	17
References	22
<b>CHAPTER - 2 EXPERIMENTAL TECHNIQUES</b>	<b>30-62</b>
2.1 Glow discharge dc sputtering	32
2.2 Magnetron sputtering	34
2.3 Reactive sputtering	38
2.4 Dc magnetron sputtering	41
2.5 Target erosion and film uniformity	43
2.6 Substrate cleaning	45
2.7 Film thickness measurements	46
2.8 Composition analysis	47
2.9 Structural analysis	48
2.10 Surface morphology	50
2.11 Electrical characterization	52
2.12 Optical characterization	54
2.13 Figure of merit	58
References	59
<b>CHAPTER - 3 RESULTS &amp; DISCUSSION</b>	<b>63-116</b>
3.1 Effect of oxygen partial pressure	65
3.2 Effect of substrate temperature	78
3.3 Effect of sputtering power	88
3.4 Effect of sputtering pressure	94
3.5 Effect of substrate bias voltage	105
References	114

<b>CHAPTER – 4</b>	<b>RESULTS &amp; DISCUSSION</b>	<b>117-137</b>
4.1	Dependence of the cathode potential on the oxygen partial pressure	118
4.2	Dependence of the cathode potential on the substrate temperature	119
4.3	Dependence of the deposition rate on the oxygen partial pressure	120
4.4	Dependence of the deposition rate on the substrate temperature	121
	<b>STRUCTURAL PROPERTIES</b>	
4.5	Effect of oxygen partial pressure	122
4.6	Effect of substrate temperature	124
	<b>ELECTRICAL PROPERTIES</b>	
4.7	Effect of oxygen partial pressure	126
4.8	Effect of substrate temperature	128
	<b>OPTICAL PROPERTIES</b>	
4.9	Influence of oxygen partial pressure	130
4.10	Figure of merit	132
4.11	Effect of substrate temperature	133
4.12	Figure of merit	134
	References	136
<b>CHAPTER – 5</b>	<b>SUMMARY &amp; CONCLUSIONS</b>	<b>138-146</b>
