ACKNOWLEDGEMENTS

It gives me great pleasure to express my deep sense of gratitude to my research supervisor Prof. P. Jayarama Reddy, F.Inst.P for his constant care, generous attitude and affectionate help which enabled me to complete the research work. His keen interest and valuable suggestions helped me to overcome many a hurdle in the course of this work.

I am highly thankful to Dr B Srinivasulu Naidu and Dr S Uthanna, Lecturers in thin films division for being available at all times of need.

On this occasion I express my thanks to Prof J Lakshmana Rao, Head, Department of Physics.

I express my heartfelt thanks to Dr G Vasperic and Miss G Gouri Devi for their useful suggestions during the initial stages of the work.

With great joy I express my gratitude to my colleagues Dr P Sreedhara Reddy, Dr O Md Hussain, Mr G Raghupathi Chetty, Mr K I Ramakrishna Reddy, Mr H Gopala Swamy and Miss Y Aparna for their cheerful and spontaneous assistance, offering encouragement at every stage of my work.
In this connection, I express my sincere and heartfelt thanks once again to Dr P Sreedhara Reddy and Miss Y Aparna who extended their help in typing the manuscript with ever ready sense of kind cooperation and great concern. I wish to record the help rendered by Dr Sai Piusad for drafting the graphs.

I am grateful to the Director, Defence Metallurgical and Research Laboratory, Hyderabad for permitting me to utilise the analytical facilities available and to Prof Oechner, University of Kaiserslautern, F R G for providing the AES for compositional analysis.

Finally, I am thankful to the Department of Non-Conventional Energy Sources, New Delhi for providing the financial assistance during the tenure of this work and to the authorities of Sri Venkateswara University for providing the necessary facilities.
