ACKNOWLEDGEMENT

The research work reported in this thesis has been carried out under the able guidance of Dr. A.R. Santhakumar, Professor and Dean of Civil Engineering, Anna University, Chennai and Dr. T.V.S.R. Appa Rao, Director, Structural Engineering Research Centre, Chennai. The author wishes his deep sense of gratitude and indebtedness to them for their valuable guidance, constant encouragement, constructive comments and inspiring discussions during the course of this work. The author expresses his heartfelt thanks to the scientists of Structural Engineering Research Centre for providing all the laboratory facilities and never ending encouragements.

The author is greatly indebted to Dr. G.V. Rao, Professor of Civil Engineering, Indian Institute of Technology, Delhi, for his invaluable suggestions for selection of the problem. The author is grateful to Dr. N.R. Krishnaswamy, Professor of Geotechnical Engineering Division, Indian Institute of Technology, Madras, Dr. M. Lakshmipathy, Professor of Civil Engineering, Anna University, Chennai and Dr. A.V. Shroff, Professor of Applied Mechanics, M.S. University, Baroda for the critical evaluation of the work.

The author expresses his deep sense of gratitude to his friends Dr. S.P. Singh, Mr. S. Dash, Mr. N. Suresh and Mr. G.S. Dwarkish for their cheerful company, constant encouragement and valuable discussions. The author acknowledges gratefully the affectionate forbearance and continuous encouragement of his wife and son.

Finally the author wishes to thank all those who have helped directly or indirectly in bringing out the thesis to this shape.
