ACKNOWLEDGEMENTS

It is with immense gratitude and indebtedness that the author expresses her sincere thanks to her advisor Dr. R. Ramesh, Assistant Professor, Centre for Water Resources, Anna University, for his outstanding guidance and leadership, during the course of this research work. His innovative approach, timely encouraging advises and personal attention have been truly motivating to enable the presentation of this thesis.

The author is deeply thankful to Prof. N. V. Pundarikanthan, Director and to Prof. S. Ramachandran of the Centre for Water Resources, for their encouragement and academic support.

The doctoral committee members, Prof. V. N. Raja Rao of University of Madras and Prof. T. Balasubramanian of Annamalai University, are immensely thanked for their constructive suggestions and expert advises.

The initial momentum and expert guidance provided by Prof. R. Natarajan, Emeritus Scientist, M.S. Swaminathan Research Foundation, Madras, is gratefully remembered and acknowledged.

The technological know-how and facilities provided by Dr. D. C. Parashar, Deputy Director and Head, Dr. P. K. Gupta, Scientist of the National Physical Laboratory, Dr. T. Ramaswami and Dr. M. Swamy of Central Leather Research Institute are gratefully acknowledged.

The financial grant provided by the Council of Scientific and Industrial Research by way of awarding Senior Research Fellowship for the conduct of this research work is acknowledged.

The blessings and moral strength given by her parents and brother are also duly to be recorded here with immeasurable gratitude.
