ACKNOWLEDGEMENTS

It is a great pleasure to express my sincere thanks and gratitude to my Research Supervisor Dr. (Ms.) Sujatha Ramamurti for her inspiring guidance throughout the period of work. She had spared no pains in supervising the study and giving me useful suggestions well as writing up of thesis. I deem that it is my good fortune to work under her supervision and submit the thesis.

I am greatly indebted to Prof. P.V. Ramamurthi, Professor of Psychology for his guidance and help from time to time during the period of my Research work.

I sincerely thank the Head and staff of the Department of Home Science, S.V.U. College of Arts and Sciences, Tirupati for extending all the necessary help and assistance and kind word of encouragement.

I am grateful to Sri G. Munirathnam, Secretary, Rayalaseema Seva Samithi (RASS) Tirupati for permitting me to visit and record the necessary data of the Aged from Day Care Centres and Old Age Homes. I also thank Ms. A.B. Srilatha, Home Scientist, Acharya Rang Krishi Vignana Kendra, Anjaneyapuram, Renigunta Mandal for all her help during my visit to these old age homes.

I am greatly indebted to the subjects of my study for their active cooperation in filling up various schedules concerned with my investigation and for consenting to give the blood samples for biochemical analysis.

I sincerely thank Dr. V. Venkata Subbaiah, Soil Chemist and Ms. M.C. Patnaik, Ass. Research Officer of Micronutrients Laboratory, Agricultural Research Station, A.P.A.U. Rajendranagar, Hyderabad for allowing me to use Atomic Absorption Spectrophotometer (AAS) and helping me in estimating the serum zinc levels.

I wish to record my sincere thanks to Dr. P. Kodandarami Reddy, Reader in Econometrics, S.V. University for his help in the Computer analysis of the results.

I sincerely thank Dr. S. Padmanabhaiah, Reader in Education, S.V. University for his unstinted cooperation and guidance in the Statistical analysis of my research data.

I am grateful to the Principal, Head and staff of the Department of Home Science S.P.W. College for their help, advice and encouragement throughout the period of study.

I also thank Sri Y. Muni Reddy, Lab Technician for helping me in Biochemical analysis of the blood samples and Sri A. Mohan, Dept. of Home Science, S.V.U for his ready help in typing various papers.

My sincere thanks are due to the University Grants Commission (UGC) for granting me Teach Fellowship under the Faculty Improvement Programme (FIP) and T.T.D. authorities for permitting me to avail the fellowship and work for my Ph.D.
I thank the Director of National Institute of Nutrition, Hyderabad for permitting me to use the Library for my review of literature.

I sincerely record my appreciation for the meticulous computer typing and neat execution of thesis work by Sri P. Karthik and his colleagues of Siddhartha Photostats, Tirupati and I thank them very much.

Last but not the least, I am thankful to my parents and brother for their constant help throughout the study. I owe my special thanks to my husband Sri E. Phalgunu Kumar and my children Chi. Chaitanya and Chi. Chandana whose kind help, understanding and constant encouragement made this venture possible.

(K. VIJAYA LAKSHMI)
