## Chapter I INTRODUCTION
- 1.1 Historical Perspective                         | 1    |
- 1.2 Structure of the Ionosphere                     | 3    |
- 1.3 Motions of the Equatorial Ionosphere            | 5    |
- 1.4 Equations of the Ionosphere                     | 7    |
- 1.5 Equatorial F-region Instabilities               | 12   |
- 1.6 Measurement Techniques                          | 14   |
- 1.7 Scope of the Study                              | 17   |

## Chapter II MEASUREMENT TECHNIQUES
- 2.1 Introduction                                    | 18   |
- 2.2 The HF Doppler Radar System                     | 18   |
- 2.3 The Frequency Synthesizer                        | 20   |
- 2.4 Transmitting System                             | 21   |
- 2.5 The HF Phase Coherent Receiver                  | 23   |
- 2.6 Data Acquisition System                         | 25   |

## Chapter III MERIDIONAL WINDS
- 3.1 Introduction                                    | 27   |
- 3.2 Analysis Method                                 | 28   |
- 3.3 HWM 90 Model                                    | 32   |
- 3.4 Data Analysis                                   | 33   |
- 3.5 Results and Discussion                          | 33   |

## Chapter IV ELECTRODYNAMIC DRIFT AT F-REGION
- 4.1 Introduction                                    | 36   |
- 4.2 Vertical Drift Velocity                          | 37   |
- 4.3 Data Analysis and Discussion                    | 38   |
- 4.4 Zonal Plasma Drifts                             | 42   |
- 4.5 Total Electrodynamic Drift Velocity              | 42   |

## Chapter V EQUATORIAL SPREAD-F
- 5.1 Introduction                                    | 44   |
- 5.2 Data Analysis                                   | 48   |
- 5.3 Results and Discussion                          | 49   |

## Chapter VI CONCLUSIONS

REFERENCES                                             | 57   |
