ACKNOWLEDGEMENT

This study on "Pace and Pattern of Marketing of Tobacco in Kheda District of Gujarat State" is submitted for the award of Ph.D. degree in Economics of Sardar Patel University. This study is an outcome of the initiative taken by Prof. A.S. Patel under whose guidance and supervision the present work is completed. My heartfelt thanks are due to him because he not only helped me in formulating my thesis, but also enabled me to acquaint myself with a large volume of economic literature and research techniques. From selecting the topic to the completion of the thesis, he had been a source of inspiration, constant help and guidance. But for his painstaking proper guidance, probably the thesis could not have seen the light of the day.

My thanks are also due to Dr. J.H. Adhvaryu and Dr. M.T. Pathak of Sardar Patel University, Vallabh Vidyanagar, for their valuable comments.

I am also very much thankful to my colleagues in the Department, Prof. H.F. Patel and Dr. Dilip Bagchi for their valuable help at several stages of the thesis.

My thanks are due to Dr. R.J. Mody, Sardar Patel Institute of Economic and Social Research, Ahmedabad, who granted me the ICSSR study grant for three consecutive years, i.e., 1978-79, 1979-80 and 1980-81. He extended his ever-helping hand to me for the discussion on important problems. He not only encouraged me in the periods of difficulties, but also inspired by clarifying my doubts about the problems of my work. Thus, he helped me as a friend, philosopher and guide.

My thanks are also due to high officials of the Directorate of Tobacco Development, Government of India, Madras, for their invaluable help and guidance.
My thanks are also due to high officials of Bidi Tobacco Research Station, Anand, for their constant help.

I am also very much thankful to high officials of Indian Institute of Management, Ahmedabad.

My thanks are also due to Shri D.M. Brahmbhatt of Agro-Economic Research Centre, Vallabh Vidyanagar, who helped me in table formulation and also in the earlier draft.

I am also very much thankful to my friend, Shri V.G. Patel of Agro-Economic Research Centre who supervised the data processing work. My thanks are also due to the investigators of Irrigation Cell of the Department of Economics, Sardar Patel University, who helped me in data collection and processing.

I am highly thankful to the Librarians and their staff of Sardar Patel University, Vallabh Vidyanagar, Indian Institute of Management, Ahmedabad, and Sardar Patel Institute of Economic and Social Research, Ahmedabad, who provided all library facilities in carrying out my research work.

I am very much thankful to Shri B.C. Patel who typed this thesis neatly and clearly.

I am also very much thankful to the U.G.C. authorities for granting me a grant of Rs.3500/- for carrying out the field study of my research work.

Last but not the least, I am very much thankful to my respondent farmers who gladly responded to queries very patiently and warmly during unduly long sessions of my field work.

I had the benefit of getting assistance and suggestions from several quarters. However, it is needless to add that I alone am responsible for the mistakes, if any, and the views and conclusions arrived at in this study.

S. K. Patel
